Contents

Message from the Hon'ble Chief Minister....3
Preface....4
Part A. India's trade agreements....5
Part B. Madhya Pradesh's five export sectors under the agreements....17
B1. Engineering and auto components....18
B2. Pharmaceuticals....29
B3. Agriculture and food....36
B4. Textiles and apparel....46
B5. Chemicals....55
Part C. How to claim the preferential duty: five steps....63
Part D. Support for exporters....72
Part E. Contacts....77
Annex 1. Rules of origin for Madhya Pradesh's main lines, agreement by agreement....88
Annex 2. Cost sheet, supplier declaration and the documents a verification asks for....92
Annex 3. The origin declaration: what the exporter signs....94
Annex 4. HS code index....96
Glossary....102

Message from the Hon'ble Chief Minister

Madhya Pradesh makes what the world buys: medicines, auto components, cotton and garments, soybean, wheat, pulses and spices, chemicals. India's agreements with the United Kingdom, the United Arab Emirates, Australia, the EFTA countries, Oman and New Zealand have removed the duty on most of these products, and the agreement with the European Union will follow.

A duty that has been removed is of no use until the exporter claims it. This Handbook tells every exporter in the State, in plain language, what each agreement gives their product and how to claim it. It will be kept current on the MP Trade Portal.

I ask every manufacturer, farmer producer organisation and artisan enterprise in Madhya Pradesh to read the chapter on their sector, call the FTA Helpdesk if anything is unclear, join the FTA Accelerator if they have not yet shipped under an agreement, and ship.

Dr. Mohan Yadav

Chief Minister, Madhya Pradesh
Bhopal, 5 November 2026

Preface

The Department of Commerce examined 870 product-market lines for Madhya Pradesh under the new agreements and found 555 where the State can act now. That analysis is the spine of this Handbook. Part B turns it into tables an exporter can use: the HS code, the market, the partner's import demand, the duty before and after the agreement, and what has to be done to sell there.

Part C is the practical part. It takes the exporter through the five steps of a claim, from the HS code to the proof of origin on the Trade Connect ePlatform, with a simple test of whether a claim is worth the effort on a given consignment. Part D lists every scheme an exporter from the State can use, with the figures, and Part E lists the offices and the people to call.

The Handbook is one of five things the State launched on 5 November 2026. The others are the Madhya Pradesh FTA Action Plan 2026-27, with its Sector Intervention Matrices for engineering and auto components, pharmaceuticals, agriculture and food, and textiles and apparel; the FTA Helpdesk at the MPIDC Export Cell, which answers within two working days; the FTA module of the MP Trade Portal; and the FTA Accelerator, which takes eighty firms, twenty from each of four sectors, through their first shipment under an agreement between December 2026 and February 2027.

The text of each agreement and the notifications of DGFT and Customs govern; where this Handbook summarises a rule, check the product-specific rule for your tariff line on Trade Connect or with the Helpdesk before shipping. The Handbook will be revised when the agreement with the European Union enters into force. Corrections and suggestions are welcome at the Helpdesk and will be carried into the next edition.

Neeraj Mandloi

Additional Chief Secretary, Industrial Policy and Investment Promotion
Government of Madhya Pradesh

Part A. India's trade agreements

India's trade agreements in force run from the Sri Lanka agreement of 2000 and the ASEAN, Korea and Japan agreements of 2010 and 2011 to the agreements with the UAE, Australia, EFTA, Oman, the UK and New Zealand concluded since 2022; the agreement with the European Union's 27 Member States was concluded in January 2026 and will enter into force after ratification. The seven recent agreements cover the markets where Madhya Pradesh products gain the most; the older agreements remain in force and are summarised at the end of this Part.

EXHIBIT 1

Six agreements in force since May 2022; the European Union agreement is expected in 2027

Date of entry into force of each agreement; the EU dates are the expected dates

Source: Table A1; Department of Commerce; DGFT

A1. The agreements at a glance

Agreement	Partner	In force	Proof of origin
India–EU Free Trade Agreement	European Union (27 countries)	Signing expected in Brussels in December 2026; in force expected in 2027 after ratification	Registered-exporter statement (to be notified)
India–New Zealand Free Trade Agreement	New Zealand	20 October 2026	Agency certificate; Status Holders may self-declare
India–Oman Comprehensive Economic Partnership Agreement	Oman	1 June 2026	Agency certificate
India–EFTA Trade and Economic Partnership Agreement	EFTA (Switzerland, Norway, Iceland, Liechtenstein)	1 October 2025	Self-declared eCoO, or agency certificate
India–Australia Economic Cooperation and Trade Agreement	Australia	29 December 2022	Agency certificate
India–UAE Comprehensive Economic Partnership Agreement	UAE	1 May 2022	Agency certificate
India–UK Comprehensive Economic and Trade Agreement	United Kingdom	15 July 2026	Self-declared eCoO, or agency certificate
India–Mauritius CECPA		1 April 2021	Certificate of Origin from the notified agencies (Appendix 2B list)

A

Agreement	Partner	In force	Proof of origin
ASEAN–India Trade in Goods Agreement	ten ASEAN countries	1 January 2010 (dates vary by country to 2011)	Certificate of Origin (Form AI) from the Export Inspection Agencies (all goods), Textiles Committee (textiles and made-ups) or MPEDA (marine products)
India–Japan CEPA		1 August 2011	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA)
India–Korea CEPA		1 January 2010	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA)
India–Singapore CECA		1 August 2005 (rules revised 14 September 2018)	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA)
India–Malaysia CECA		1 July 2011	Certificate of Origin (Form MICECA
India–Sri Lanka FTA		1 March 2000	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA)
SAFTA	Bangladesh, Bhutan, Maldives, Nepal, Pakistan, Sri Lanka, Afghanistan	1 January 2006	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA)
Asia-Pacific Trade Agreement	Bangladesh, China, Korea, Lao PDR, Sri Lanka, Mongolia	In operation since 1976	Certificate of Origin from the agencies in Appendix 2D
Global System of Trade Preferences	developing countries	In operation since 1989	Certificate of Origin (Export Inspection Agencies, Textiles Committee, Tobacco Board, MPEDA)
India–Chile PTA		August 2007 (expanded 16 May 2017)	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA)
India–MERCOSUR PTA	Argentina, Brazil, Paraguay, Uruguay	1 June 2009	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA)

Source: Department of Commerce; DGFT. "Proof of origin" is the document the importer presents to claim the preferential duty. Where the agreement allows self-certification, the exporter signs the origin declaration; otherwise a notified agency issues the Certificate of Origin through the Trade Connect ePlatform.

All preferential certificates for Indian exports are issued only through the Trade Connect ePlatform (trade.gov.in), by the agencies DGFT authorises; manual certificates are not valid (Foreign Trade Policy paragraph 2.62, as amended by DGFT Notification 05/2026-27 of 7 April 2026). The invoice number on the certificate must be the same as on the shipping bill, because the partner's customs verifies it automatically.

Agency certificates carry the fee in Appendix 2K of the Handbook of Procedures and are to be delivered within one working day; self-declared certificates under the UK and EFTA agreements carry no fee.

The Approved Exporter Scheme in the Foreign Trade Policy (self-certification by manufacturer Status Holders) takes effect only when it is written into a specific agreement and notified; so far the self-declaration routes are those for the UK and EFTA agreements and the Status Holder declaration under the New Zealand agreement.

A2. Market access for Madhya Pradesh's sectors

Share of the sector's tariff lines that enter duty-free from entry into force under each agreement, as computed by the Department of Commerce for the State's export lines. The balance is under a tariff quota or excluded.

Sector	UK	UAE	Australia	EFTA	Oman	New Zealand	EU
Engineering and auto components	99.6%	97.5%	100%	100%	99.7%	100%	84%*
Pharmaceuticals	100%	98.3%	100%	100%	100%	100%	100%
Agriculture and food	94%	88%	100%	40%†	91%	100%	75%‡
Textiles and apparel	100%	100%	100%	100%	100%	100%	100%
Chemicals	100%	100%	100%	100%	100%	100%	98%

* A further 15% of engineering lines enter the EU under tariff quotas. † In EFTA a further 17% of agricultural lines are under quota and 44% are excluded. ‡ In the EU a further 12% of agricultural lines are under quota. Source: Department of Commerce, "FTA Leverage Strategy for Madhya Pradesh Exports", 2026.

Shading: the darker the cell, the larger the share of the sector's lines that enter duty-free.

A

United Kingdom

India–UK Comprehensive Economic and Trade Agreement (CETA)

Signed · In force	24 July 2025 · 15 July 2026
What it gives	Duty-free entry for about 99% of India's tariff lines to the UK, covering nearly all of India's export value; UK duty on Indian textiles and apparel, leather, auto parts, machinery, chemicals and processed foods goes to zero on entry into force. Indian rules: Customs Notification 62/2026-Customs (N.T.) of 3 July 2026.
Proof of origin	Origin declaration by the exporter (self-certification), filed in India as a self-declared electronic Certificate of Origin on the Trade Connect ePlatform: choose "India UK CETA (Self-Declaration)", digital signature linked to the IEC, no fee (DGFT Trade Notice 11/2026-27 of 13 July 2026). An agency certificate is also accepted; a UK importer may claim on its own knowledge of origin with the exporter's documents. Valid 12 months; one declaration may cover repeated shipments of identical goods for up to 12 months (box 10 of the template, see Annex 3); may be completed retrospectively; the UK waives proof for consignments up to £1,000.
Who issues it	Self-declaration by the exporter; or DGFT Regional Authorities, Export Inspection Agencies, APEDA, Spices Board, Textiles Committee, Development Commissioner (Handicrafts), Central Silk Board and the other agencies notified under Appendix 2B (Public Notice 10/2026-27 of 11 May 2026).
Rule of origin	Wholly obtained, or the product-specific rules in Annex 3A: a change in tariff classification and/or the standard value content (40% of the ex-works price or 45% of FOB by build-down, or 35% by build-up). Higher thresholds: vehicles of chapter 87 a change in heading plus 45% ex-works (50% FOB) build-down or 40% build-up; parts of 8708 a change in heading, or 50% ex-works (55% FOB) build-down or 45% build-up; articles of iron or steel of chapter 73 a change in heading plus the same 50/55/45; iron and steel of chapter 72 melted and poured in India or the UK. Tolerance 12.5% by value (7.5% or 12.5% for agricultural chapters). Bilateral cumulation. Records five years. Line rules in Annex 1.
MP sectors that gain	Textiles and apparel, auto components and engineering, processed food (namkeen, biscuits, sauces), pharmaceuticals, organic chemicals, soybean products.
At the border	Imports are declared through HMRC; food of animal origin and high-risk plant foods are pre-notified by the GB importer (IPAFFS) and enter through a border control post under the Border Target Operating Model; Indian spices, chilli, okra and drumsticks need an official certificate and a laboratory report with each consignment (20% physical checks). Details by sector in Part B.

Madhya Pradesh product lines where the duty falls (largest 6 of 52; 31 more lines already at zero duty, see Part B)

HS	Product	Sector	Partner imports (USD mn)	Duty before	Duty after	What to do
870421	Goods vehicles, diesel, light	Engineering and auto components	7,993	14%	0%	Enter the market
210690	Namkeen & food preparations	Agriculture and food	3,140	3%	0%	Enter the market
870829	Body parts & accessories	Engineering and auto components	2,317	4%	0%	Enter the market
870899	Automotive components	Engineering and auto components	2,278	3%	0%	Enter the market
870840	Gear boxes & parts	Engineering and auto components	1,776	4%	0%	Enter the market
760612	Aluminium plates & sheets	Engineering and auto components	1,747	8%	0%	Enter the market

UAE

India–UAE Comprehensive Economic Partnership Agreement (CEPA)

Signed · In force	18 February 2022 · 1 May 2022
What it gives	Zero duty on 97% of the UAE's tariff lines, covering 99% of India's exports by value, with immediate zero duty for textiles, engineering goods and pharmaceuticals and phased cuts on the rest; the 5% GCC duty on most Madhya Pradesh products goes to zero. Indian rules: Customs Notification 39/2022-Customs (N.T.).
Proof of origin	Certificate of Origin issued by a notified agency through the Trade Connect ePlatform; valid 12 months; issued before, at or within five working days of export, or retrospectively within 12 months. The importer in the UAE claims the preference against it (Abu Dhabi Customs exemption code 56). No self-certification for Indian exporters.
Who issues it	DGFT Regional Authorities, Export Inspection Agencies, APEDA, MPEDA, Spices Board (spices), Textiles Committee (textiles and made-ups), Development Commissioner (Handicrafts), Central Silk Board, Coir Board, Tobacco Board and the SEZ Development Commissioners (Appendix 2B).
Rule of origin	Wholly obtained (cereals, oilseeds, honey and most fresh produce), or the product-specific rule in Annex 3B: typically a change in tariff heading or sub-heading plus value addition of at least 40% of FOB (35% of ex-works), by build-down or build-up; vehicles and parts of chapter 87 and aluminium articles of chapter 76 need 45% (40% of ex-works); iron and steel of headings 7206 to 7229 must be melted and poured in India or the UAE. Tolerance 10% of value; textiles 7% by weight or 10% by value. Bilateral cumulation. Records five years.
MP sectors that gain	Auto components and engineering goods, pharmaceuticals, cotton T-shirts and garments, polyester fabric, namkeen and biscuits, basmati and non-basmati rice, soybean meal, spices.
At the border	Food is registered and its Arabic label approved before import (FIRS in Dubai, ADAFSA in Abu Dhabi, the federal ZAD system) and every consignment carries a health certificate from the Indian competent authority. Details by sector in Part B.

Madhya Pradesh product lines where the duty falls (largest 6 of 35; 11 more lines already at zero duty, see Part B)

HS	Product	Sector	Partner imports (USD mn)	Duty before	Duty after	What to do
870899	Automotive components	Engineering and auto components	1,903	5%	**0%**	Enter the market
870421	Goods vehicles, diesel, light	Engineering and auto components	1,493	5% or 10%	**0%**	Enter the market
210690	Namkeen & food preparations	Agriculture and food	947	5%	**0%**	Enter the market
610910	Cotton T-shirts & vests	Textiles and apparel	572	5%	**0%**	Scale up
540752	Textured polyester, dyed	Textiles and apparel	433	5%	**0%**	Enter the market
870829	Body parts & accessories	Engineering and auto components	411	5%	**0%**	Enter the market

A

Australia

India–Australia Economic Cooperation and Trade Agreement (ECTA)

Signed · In force	2 April 2022 · 29 December 2022
What it gives	Zero duty on 96% of India's exports to Australia by value from entry into force and on all lines within four years; textiles, apparel, engineering goods, pharmaceuticals, chemicals and most food products enter duty-free. Indian rules: Customs Notification 112/2022-Customs (N.T.).
Proof of origin	Certificate of Origin issued by a notified agency through the Trade Connect ePlatform; valid 12 months; issued before or within five working days of export, or retrospectively within 12 months. No self-certification for Indian exporters (to be reviewed under the agreement).
Who issues it	DGFT Regional Authorities, Export Inspection Agencies, APEDA, MPEDA, Spices Board, Textiles Committee, Development Commissioner (Handicrafts), Central Silk Board, Coir Board, Tobacco Board and the SEZ Development Commissioners (Appendix 2B).
Rule of origin	Wholly obtained, or, for every line not listed in Annex 4B, the general rule of Article 4.3: a change in tariff sub-heading plus a qualifying value content of at least 35% of FOB (build-up) or 45% of FOB (build-down), with the final production process in India. Annex 4B lists its own rules only for farm products and foods (chapters 1 to 24), raw hides, skins and furskins, waste paper, raw silk and cotton, and iron and steel of chapter 72 (cereals, oilseeds, pulses and spices wholly obtained; puffed cereals a change in chapter; steel melted and poured); engineering goods, pharmaceuticals, chemicals, garments and made-ups follow the general rule. Tolerance 10% of value; textiles 10% by weight. Bilateral cumulation. Records five years.
MP sectors that gain	Auto components, pumps and valves, steel and aluminium articles, agrochemicals, pharmaceuticals, cotton garments and home textiles, namkeen and biscuits.
At the border	Biosecurity comes first: the import conditions for every product are in the BICON database and many need an import permit; fresh fruit and vegetables from India have no pathway except mango (irradiated) and pomegranate. Details by sector in Part B.

Madhya Pradesh product lines where the duty falls (largest 6 of 50; 20 more lines already at zero duty, see Part B)

HS	Product	Sector	Partner imports (USD mn)	Duty before	Duty after	What to do
870421	Goods vehicles, diesel, light	Engineering and auto components	6,606	5%	**0%**	Enter the market
300215	Immunological products	Pharmaceuticals	2,373	5% or 0%	**0%**	Enter the market
210690	Namkeen & food preparations	Agriculture and food	1,641	4% or 5%	**0%**	Enter the market
848180	Taps, cocks & valves	Engineering and auto components	1,192	3%	**0%**	Enter the market
730890	Iron / steel structures	Engineering and auto components	1,070	4%	**0%**	Enter the market
732690	Articles of iron or steel	Engineering and auto components	901	5%	**0%**	Enter the market

A

EFTA (Switzerland, Norway, Iceland, Liechtenstein)

India–EFTA Trade and Economic Partnership Agreement (TEPA)

Signed · In force	10 March 2024 · 1 October 2025
What it gives	Zero duty on textiles, clothing and industrial goods into the four countries, with the real duty gains in Norway (apparel, home textiles and some processed food) and in Swiss and Norwegian agricultural lines, because Switzerland has charged no duty on industrial goods from any country since 1 January 2024. Agricultural access is partial, with tariff quotas and exclusions in the processed-food lines. Swiss duties on industrial goods are nil for every supplier, so Switzerland offers no duty gain on textiles, chemicals or engineering goods. Indian rules: Customs Notification 59/2025-Customs (N.T.).
Proof of origin	Self-declared electronic Certificate of Origin by the exporter on the Trade Connect ePlatform: choose "India EFTA TEPA (Self-Declaration)", digital signature linked to the IEC, no fee (DGFT Trade Notice 13/2025-26 of 30 September 2025); or an agency-issued certificate. Valid 12 months; issued within five working days of export or retrospectively within one year. Swiss customs verifies the certificate by its QR code.
Who issues it	Self-declaration by the exporter; or DGFT Regional Authorities, Export Inspection Agencies, APEDA, Spices Board, Textiles Committee, Development Commissioner (Handicrafts) and the other agencies notified under Appendix 2B (Public Notice 30/2025-26).
Rule of origin	Wholly obtained, or the product-specific rules in Appendix 2.A.1 to Annex 2.A: a change in heading or sub-heading, a process, or a ceiling on non-originating materials as a share of the ex-works price (usually 50 to 60%; the FOB threshold is five points lower). Garments and made-ups of chapters 61 to 63 need only a change in chapter, so imported fabric may be used; yarns and fabrics of chapters 50 to 60 need a change in sub-heading with non-originating materials not above 60%; iron and steel of chapter 72 must be melted and poured. Tolerance 10% of value. Cumulation among the four EFTA States and India. Records five years; verification may be requested up to five years after export.
MP sectors that gain	Pharmaceuticals and intermediates, machinery and auto components, cotton yarn and garments, processed food into Norway on the lines the schedule frees (several lines keep a calculated duty, see B3), medicinal herbs.
At the border	Switzerland has charged no duty on industrial goods from any country since 1 January 2024, so for machinery, chemicals, pharmaceuticals and textiles the agreement matters in Switzerland for recognition and cumulation; the duty gains are in Norway and in Swiss agricultural lines. Details by sector in Part B.

Madhya Pradesh product lines where the duty falls (largest 6 of 15; 50 more lines already at zero duty, see Part B)

HS	Product	Sector	Partner imports (USD mn)	Duty before	Duty after	What to do
210690	Namkeen & food preparations (Norway)	Agriculture and food	1,022	3%	PAP*	Confirm the line (see note)
611020	Cotton pullovers & cardigans (Norway)	Textiles and apparel	643	11%	**0%**	Enter the market
610910	Cotton T-shirts & vests (Norway)	Textiles and apparel	526	11%	**0%**	Enter the market
210390	Sauces & mixed condiments (Norway)	Agriculture and food	325	3%	PAP*	Confirm the line (see note)
120190	Soya beans (Norway)	Agriculture and food	205	23%	**0%**	New product
070200	Tomatoes, fresh or chilled (Norway)	Agriculture and food	178	22%	0% off season	New product (see B3)

A

Oman

India–Oman Comprehensive Economic Partnership Agreement (CEPA)

Signed · In force	18 December 2025 · 1 June 2026
What it gives	100% duty-free entry for India's exports, covering 98% of Oman's tariff lines and 99% of India's export value, from entry into force; the 5% duty on engineering goods, pharmaceuticals, textiles and processed food goes to zero. Indian rules: Customs Notification 48/2026-Customs (N.T.) of 29 May 2026.
Proof of origin	Certificate of Origin issued by a notified agency through the Trade Connect ePlatform ("India Oman CEPA (Agency Issued)", DGFT Trade Notice 06/2026-27); valid 12 months; issued before or within five working days of export, or retrospectively within 12 months. No self-certification for Indian exporters.
Who issues it	DGFT Regional Authorities, Export Inspection Agencies, APEDA, MPEDA, Spices Board, Textiles Committee, Development Commissioner (Handicrafts), Central Silk Board, Coir Board, Tobacco Board and the SEZ Development Commissioners (Public Notice 15/2026-27 of 2 June 2026).
Rule of origin	Wholly obtained (cereals, oilseeds and most farm products), or the product-specific rule in Annex 3B: chemicals, pharmaceuticals, plastics, articles of iron or steel, yarns and fabrics need a change in tariff sub-heading plus 40% value addition; machinery, electrical equipment, garments, made-ups and prepared foods a change in heading plus 40%; vehicles and parts of chapter 87 and aluminium articles 45%; iron and steel of headings 7206 to 7229 must be melted and poured in India or Oman. Value addition is by the build-down method; the build-up threshold is five points lower. Tolerance 10% of value; textiles 10% by weight or value. Bilateral cumulation. Records five years.
MP sectors that gain	Valves and pumps, auto components, steel structures, pharmaceuticals, namkeen and biscuits, rice, cotton textiles.
At the border	Food products are registered with the Food Safety and Quality Centre before sale and cleared through the Bayan customs window with a health certificate from the Indian competent authority; labels in Arabic. Details by sector in Part B.

Madhya Pradesh product lines where the duty falls (largest 6 of 22; 3 more lines already at zero duty, see Part B)

HS	Product	Sector	Partner imports (USD mn)	Duty before	Duty after	What to do
848180	Taps, cocks & valves	Engineering and auto components	360	5%	0%	Enter the market
870899	Automotive components	Engineering and auto components	119	5%	0%	Enter the market
730890	Iron / steel structures	Engineering and auto components	118	5%	0%	Enter the market
210690	Namkeen & food preparations	Agriculture and food	109	5%	0%	Enter the market
841391	Parts of liquid pumps	Engineering and auto components	76.9	5%	0%	Enter the market
870829	Body parts & accessories	Engineering and auto components	73.2	5%	0%	Enter the market

A

New Zealand

India–New Zealand Free Trade Agreement

Signed · In force	27 April 2026 · 20 October 2026
What it gives	Zero duty on all of India's exports from entry into force (New Zealand's duties were up to 10%, mainly on apparel, textiles, footwear and some processed foods). Indian rules: Customs Notification 82/2026-Customs (N.T.) of 12 October 2026; electronic certificates exchanged between the two customs administrations.
Proof of origin	Certificate of Origin issued by a notified agency through the Trade Connect ePlatform, valid 12 months, retrospective issue within 12 months; or an origin declaration (Annex 3C template) by an Indian exporter recognised as a Status Holder by the Department of Commerce. For imports into New Zealand one proof may cover repeated shipments of identical goods for a stated period of up to 12 months (box 6 of the template, Status Holders only). Self-declaration by other exporters is to be reviewed after five years.
Who issues it	DGFT Regional Authorities, Export Inspection Agencies and the sector agencies notified under Appendix 2B for the agreement; Status Holders for origin declarations.
Rule of origin	Wholly obtained, or the product-specific rule in Annex 3A: a change in tariff classification and/or a qualifying value content on FOB (build-down thresholds as listed, usually 40 or 45%; build-up thresholds ten points lower). Garments, made-ups, yarns and fabrics need a change in heading plus 40%; vehicle parts, pumps, valves, aluminium sheet and most machinery and chemicals a change in sub-heading plus 45%; articles of iron or steel a change in chapter. Tolerance 10% of value; textiles 10% by weight or value. Bilateral cumulation. Records five years.
MP sectors that gain	Cotton garments and home textiles, namkeen and sauces, pharmaceuticals, auto components, valves.
At the border	All food is imported by an MPI-registered food importer and must meet an Import Health Standard for biosecurity; fresh fruit and vegetables from India have no pathway except mango; dried chilli, paprika and pepper need food safety clearance with laboratory testing. Details by sector in Part B.

Madhya Pradesh product lines where the duty falls (largest 6 of 17; 14 more lines already at zero duty, see Part B)

HS	Product	Sector	Partner imports (USD mn)	Duty before	Duty after	What to do
870421	Goods vehicles, diesel, light	Engineering and auto components	582	0% or 5%	**0%**	Enter the market
210690	Namkeen & food preparations	Agriculture and food	463	2%	**0%**	Enter the market
848180	Taps, cocks & valves	Engineering and auto components	151	0% or 5%	**0%**	Enter the market
732690	Articles of iron or steel	Engineering and auto components	117	0% or 5%	**0%**	Enter the market
210390	Sauces & mixed condiments	Agriculture and food	108	5%	**0%**	Enter the market
870899	Automotive components	Engineering and auto components	102	0%, 5% or 10%	**0%**	Enter the market

A

European Union (27 countries)

India–EU Free Trade Agreement

Signed · In force	Negotiations concluded 27 January 2026 · Signing expected in Brussels in December 2026; in force expected in 2027 after ratification
What it gives	The EU removes duties on more than 90% of its tariff lines (91% of imports from India by value), with textiles and apparel, leather, engineering and auto components, chemicals and most processed foods duty-free on entry into force; the EU keeps its duties on rice, sugar, honey, garlic, bananas, soft wheat, milk powder and chicken, and uses quotas for a few others. Provisional text published 27 February 2026.
Proof of origin	Statement on origin made by the exporter or producer on the invoice or another commercial document, valid 12 months, with the exporter registered under an authentication mechanism (a unique identification number and an online portal where the importing customs verifies the statement); until the mechanism operates, certificates of origin issued by the notified authority have the same effect. Indian procedure to be notified by DGFT.
Who issues it	To be notified.
Rule of origin	Wholly obtained, or the product-specific rules of Annex 3-B (European pattern); tolerance 10% of the ex-works or FOB price for industrial goods, 5% or 10% by weight for agricultural chapters, textile tolerances by weight; bilateral cumulation; records five years for exporters.
MP sectors that gain	Auto components and engineering (the EU is the largest market for MP's auto component lines), pharmaceuticals, apparel and home textiles, namkeen and processed food, agrochemicals and chemicals.
At the border	Access2Markets (trade.ec.europa.eu) gives the duty, the rule of origin and the product requirements by HS code. Details by sector in Part B.

Madhya Pradesh product lines where the duty falls (largest 6 of 73; 35 more lines already at zero duty, see Part B)

The older agreements

These agreements remain in force. Preferences are claimed with a Certificate of Origin issued through the Trade Connect ePlatform by the agencies notified for each agreement: for the older agreements the Export Inspection Agencies (all goods), the Textiles Committee (textiles and made-ups) and MPEDA (marine products); for the Mauritius agreement the same seventeen agencies as for the UAE and Australia, including the DGFT Regional Authorities, APEDA, the Spices Board and the Development Commissioner (Handicrafts).

Agreement	In force	Proof of origin and general rule
India–Mauritius CECPA	1 April 2021	Certificate of Origin from the notified agencies (Appendix 2B list); product-specific value-addition rules on FOB; tolerance 12.5% (textiles 7% by weight); valid 12 months; India's quotas for Mauritian sugar, apparel, fish, pineapples, lychees, beer and rum
ASEAN–India Trade in Goods Agreement (ten ASEAN countries)	1 January 2010 (dates vary by country to 2011)	Certificate of Origin (Form AI) from the Export Inspection Agencies (all goods), Textiles Committee (textiles and made-ups) or MPEDA (marine products); general rule 35% regional value content on FOB plus change in tariff sub-heading; valid 12 months
India–Japan CEPA	1 August 2011	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA); general rule change in tariff sub-heading plus 35% qualifying value content, or the product-specific rule; tolerance 10% (7% for food chapters; textiles 7% by weight)
India–Korea CEPA	1 January 2010	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA); general rule change in tariff sub-heading plus 35% regional value content, or the product-specific rule; tolerance 10% (textiles 7% by weight); valid 12 months
India–Singapore CECA	1 August 2005 (rules revised 14 September 2018)	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA); general rule change in tariff sub-heading plus 35% local value content, or the product-specific rule; tolerance 10% (textiles 7% by weight)
India–Malaysia CECA	1 July 2011	Certificate of Origin (Form MICECA; Export Inspection Agencies, Textiles Committee, MPEDA); general rule change in tariff sub-heading plus 35% value content; tolerance 10% (textiles 8% by weight); valid 12 months
India–Sri Lanka FTA	1 March 2000	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA); 35% domestic value addition plus change in tariff heading (25% where Sri Lankan inputs make up 10% or more); negative lists on both sides; quotas on Sri Lankan tea and garments into India
SAFTA (Bangladesh, Bhutan, Maldives, Nepal, Pakistan, Sri Lanka, Afghanistan)	1 January 2006	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA); change in tariff heading plus 40% value addition (30% for least-developed members, 35% for Sri Lanka); valid 12 months
Asia-Pacific Trade Agreement (Bangladesh, China, Korea, Lao PDR, Sri Lanka, Mongolia)	In operation since 1976	Certificate of Origin from the agencies in Appendix 2D; 45% local content (35% for least-developed members)
Global System of Trade Preferences (developing countries)	In operation since 1989	Certificate of Origin (Export Inspection Agencies, Textiles Committee, Tobacco Board, MPEDA); 50% local content (60% for least-developed members)

Agreement	In force	Proof of origin and general rule
India–Chile PTA	August 2007 (expanded 16 May 2017)	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA); preferences on 1,798 Chilean lines including textiles, apparel, pharmaceuticals and farm products; change in tariff heading with non-originating materials not above 60% of FOB; valid one year
India–MERCOSUR PTA (Argentina, Brazil, Paraguay, Uruguay)	1 June 2009	Certificate of Origin (Export Inspection Agencies, Textiles Committee, MPEDA); preferences on listed lines only; non-originating materials not above 40% of FOB; valid 180 days

The United States. The interim arrangement announced on 2 February 2026 is not a trade agreement with rules of origin; it changes the additional duties the United States applies to listed products. No certificate of origin under a trade agreement is involved. Check the current duty on the Trade Connect Tariff Explorer before quoting.

Beyond goods: people and services. The agreements also cover services and the movement of people. Under the UK agreement, the Double Contribution Convention, in force with the agreement on 15 July 2026, exempts an Indian employee posted to the UK by an Indian employer from UK National Insurance contributions for up to five years; the employee stays in the Indian scheme and carries a Certificate of Coverage, which the employer applies for and EPFO's regional office issues (EPFO procedure of 16 July 2026; postings of up to 60 months; not retrospective). Under the New Zealand agreement, New Zealand admits up to 5,000 Indian professionals and contractual service suppliers a year on a Temporary Employment Entry visa, Indian students may work 20 hours a week during study, and graduates get a post-study work visa (Annexes 8F and 8L). A firm that sends engineers for installation, audits or training should ask the Helpdesk about these routes before the visit.

Part B. Madhya Pradesh's five export sectors under the agreements

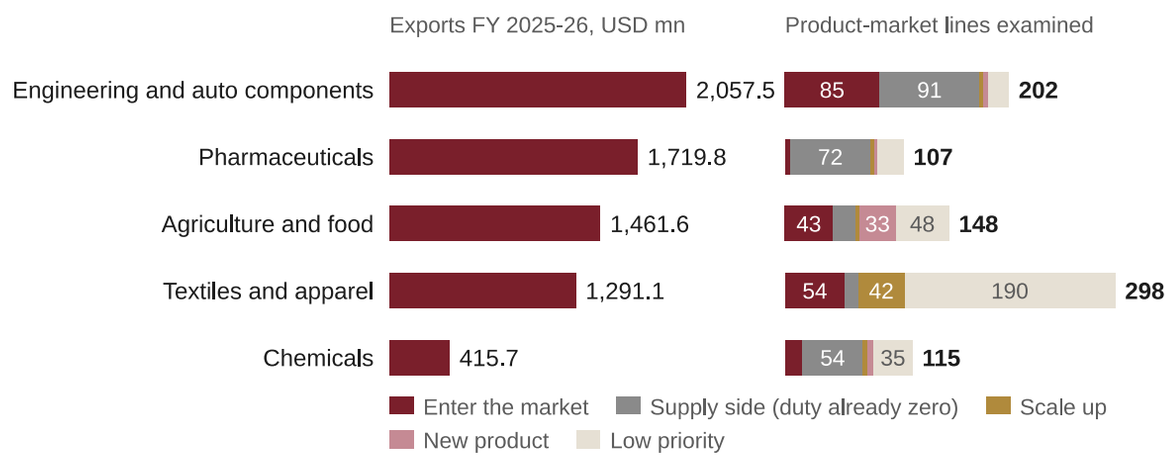

Each chapter has the same shape: where the State stands in the sector; the product lines and the markets where the duty has fallen; the lines that are already duty-free; what the rule of origin usually requires in the sector; what the buyer and the border will ask for; and who issues the certificate and which Council to join. The tables use the Department of Commerce classification of each product-market line: **scale up** (the State already exports it; grow), **enter the market** (duty has fallen, India is competitive, find buyers), **new product** (duty cut is large; develop the supply), **supply side** (duty was already zero; compete on price, quality and certification). Low-priority lines are listed at the end of each chapter for completeness.

Sector	Exports FY26 (USD mn)	Lines examined	Act now	Low priority	Chapter
Engineering and auto components	2,057.5	202	184	18	B1, page 18
Pharmaceuticals	1,719.8	107	83	24	B2, page 29
Agriculture and food	1,461.6	148	100	48	B3, page 36
Textiles and apparel	1,291.1	298	108	190	B4, page 46
Chemicals	415.7	115	80	35	B5, page 55

EXHIBIT 2

870 product-market lines examined in five sectors; 555 can be acted on now

Exports FY 2025-26, USD million; product-market lines by Department of Commerce classification, number of lines

Act now = lines examined less low priority: 184, 83, 100, 108 and 80, together 555. Source: DGCI&S, FY 2025-26; Department of Commerce, "FTA Leverage Strategy for Madhya Pradesh Exports", 2026

B1 Engineering and auto components

Where the State stands

Exports of USD 2,057.5 million in FY 2025-26, 26% of the State's exports and 1.7% of India's engineering exports. Engineering is the State's largest export sector. The agreements remove duties of 3 to 14% on auto components, light commercial vehicles, pumps and valves, steel and aluminium articles in the UK, the UAE, Australia, Oman and New Zealand, and will do so in the EU, which is the largest market for every one of these lines. In Switzerland and Norway most engineering lines were already duty-free; there the work is on standards and buyers.

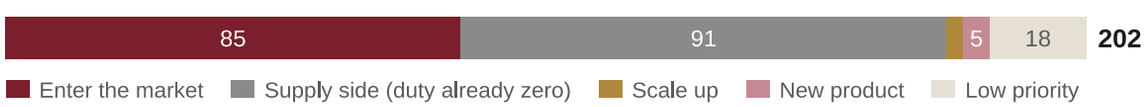

USD 2,057.5 mn	26%	202
Exports, FY 2025-26	of the State's exports	product-market lines examined

202 product-market lines examined: 85 where the duty falls and India is competitive (enter the market), 91 where the duty was already zero (supply side), 3 to scale up, 5 new products, 18 low priority.

EXHIBIT 3

Engineering and auto components: 85 of 202 lines to enter; 91 were already duty-free

Product-market lines examined, by Department of Commerce classification, number of lines

For Norway, Switzerland and Iceland the Department of Commerce sheet gives the same import figure for all three countries, which appears to be the figure for the EFTA group [to confirm with the Department of Commerce]. New Zealand: the Working Tariff carries only free, 5% and 10% rates, so the 2 to 4% figures in the Department of Commerce sheet are averages; where a six-digit code covers lines at more than one rate the table shows the rates (870421 read on the Working Tariff of 20 October 2026; 848180, 732690, 731815 and 854442 on the tariff pages of 2018 and 870829 and 870899 on those of 2023 [confirm on the current Working Tariff]). Every New Zealand line is nil for Indian goods from entry into force. European Union: figures with a decimal (2.7%, 3.7%, 7.5%) are the base rates in the EU schedule published in February 2026 (Appendix 2-A-1), all eliminated at entry into force; the other EU figures are the Department of Commerce figures, which round to whole numbers. The EU schedule for chapters 84 to 87 could not be read here.

The rule of origin in this sector

Most engineering lines use a change in tariff sub-heading or heading plus a value content rule. Imported steel, bearings, electronic sensors or sub-assemblies count as non-originating; the value added in the State (labour, overheads, profit, Indian materials) must reach the threshold of the agreement (35 to 55% depending on the agreement, the product, the method and whether the price is ex-works or FOB). Keep a cost sheet for each product and supplier declarations for Indian inputs. For products made from imported steel plate or bar, check whether the rule asks for "melt and pour" in India.

- **UK (Annex 3A):** most machinery and electrical lines follow a change in tariff sub-heading or heading, or the standard value content (40% of the ex-works price build-down, 45% of FOB, or 35% build-up): pumps, valves and cables need a change in sub-heading or the standard value content; parts of pumps and valves, motors and aluminium sheet a change in heading or the standard value content. Vehicles of chapter 87 (for example light goods vehicles of 8704) need a change in heading plus 45% of ex-works (50% of FOB) by build-down or 40% by build-up. Parts and accessories of 8708 need a change in heading, or 50% of ex-works (55% of FOB) by build-

down or 45% by build-up. Articles of iron or steel of chapter 73 (structures, fasteners, castings, other articles) need a change in heading plus 50% of ex-works (55% of FOB) by build-down or 45% by build-up; iron and steel of chapter 72 must be melted and poured in India or the UK. Tolerance 12.5% of value.

- **UAE:** a change in heading plus 40% value addition on FOB (35% on ex-works) for machinery and electrical equipment; a change in sub-heading plus 40% for articles of iron or steel; vehicles and parts of chapter 87 and aluminium articles 45% (40% on ex-works); steel of headings 7206 to 7229 melted and poured. **Australia:** none of these engineering lines is listed in Annex 4B, so the general rule applies: a change in sub-heading plus 35% build-up or 45% build-down of FOB, with the final production process in India. **Oman:** machinery and electrical equipment a change in heading plus 40%; articles of iron or steel a change in sub-heading plus 40%; vehicles and parts of chapter 87 and aluminium articles 45% (aluminium with a change in heading); iron and steel of headings 7206 to 7229 melted and poured in India or Oman. **New Zealand (Annex 3A):** vehicles and parts, pumps, valves, aluminium sheet and most machinery a change in sub-heading plus 45% of FOB (35% build-up); parts of pumps and valves, other aluminium articles and insulated cables and wiring sets a change in heading; motors a change in heading plus 40%; articles of iron or steel a change in chapter.
- **EFTA (Appendix 2.A.1):** vehicle parts of 8708, structures, fasteners and other articles of iron or steel, valves and motors need a change in heading, or non-originating materials not above 50% of the ex-works price (45% of FOB); pumps, insulated cables and aluminium sheet a change in heading or 60% (55% of FOB); other aluminium articles a change in heading; vehicles of chapter 87 a change in sub-heading with non-originating materials not above 50%; iron and steel of chapter 72 melted and poured. **EU:** the text is to be published; the EU's agreements usually ask for a change in heading with a ceiling on non-originating materials (often 40 to 50% of the ex-works price). Check the line when the agreement is in force.

What the buyer and the border will ask for

CE marking (EU) and UKCA or CE (UK) for machinery, pressure equipment and electrical products; UAE conformity (ECAS or EQM) for regulated products; Australian and NZ standards for automotive parts and electrical goods; from 2026 the EU's CBAM applies to imports of iron, steel and aluminium articles and the importer needs the embedded-emissions data from the exporter. Buyers in these markets ask for IATF 16949 or ISO 9001, material test certificates and PPAP documentation for automotive parts.

Compiled from the regulators' own publications in October 2026; the importer's obligations are shown because the exporter has to supply the documents behind them. Clauses that could not be confirmed on the regulator's own publication have been left out; the Portal carries updates.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
United Kingdom	Office for Product Safety and Standards; Vehicle Certification Agency; HMRC for CBAM. Machinery: CE or UKCA with a declaration of conformity and technical file; motors and wiring harnesses sold as equipment: electrical safety and EMC regulations; pumps and valves: pressure equipment rules where in scope; replacement brake pads and linings for cars and light vans must carry UNECE R90 approval; other safety-critical parts follow GB type approval; UK CBAM from 1 January 2027 for steel and aluminium articles (emissions data from the Indian plant); steel safeguard quotas for chapter 72 and 73 products.	Declaration of conformity (CE or UKCA) and technical file; test reports to BS EN or ISO standards; E-mark certificate (R90 for brakes, issued by a 1958 Agreement authority after ARAI or ICAT testing); mill and material certificates (EN 10204 3.1); embedded emissions data; origin declaration under the agreement.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
European Union	Member State type-approval and market surveillance authorities; customs for CBAM. Machinery Directive until 19 January 2027, then the Machinery Regulation (CE marking, technical file); low voltage and EMC directives for motors and electrical assemblies; eco design efficiency levels for motors (IE3, IE4); pressure equipment directive for valves above thresholds; RoHS; vehicle components under Regulation 2018/858 and UNECE rules (R90 for replacement brake parts, R124 wheels) with an E-mark; structural fasteners under the Construction Products Regulation; CBAM for chapter 72 and 73 articles including fasteners and other articles, and chapter 76 aluminium articles; steel tariff quotas with melt-and-pour evidence for chapter 72 and 73 steel products.	CE declaration of conformity and technical file; harmonised standard test reports (EN 60034 motors, EN ISO 12100 machinery); E-mark certificates; IMDS material data for OEM supply; EN 10204 3.1 certificates; mill certificate showing the melt-and-pour country; verified embedded emissions for CBAM.
UAE	Ministry of Industry and Advanced Technology. Cabinet Resolution 12 of 2018 (automotive spare parts): brake systems and pads, radiators, belts and mirrors, batteries, filters, laminated glass, wheels and rims, locks and hinges, lighting and relays need ECAS registration and a certificate of conformity before import, with IATF 16949 at the plant and test reports not older than three years; low-voltage electrical goods and cables under ECAS; RoHS for electrical equipment; gear boxes, axles, pumps and valves: GSO standards and buyer specifications, no pre-market scheme identified.	ECAS certificate of conformity for listed spare parts (through the importer); IATF 16949 certificate; ISO or GSO test reports; E-mark where available; mill certificates; certificate of origin under the agreement.
Australia	Department of Infrastructure (vehicle standards); electrical safety regulators (EESS, RCM); energy regulator (GEMS). Aftermarket brakes, gear boxes, axles, wheels and suspension need no pre-market approval, though buyers ask for R90 or equivalent; three-phase motors from 0.73 kW to under 185 kW need GEMS registration by the Australian supplier (IE2 minimum, IE3 high efficiency); household electrical products need EESS certification and the RCM mark; pumps and valves in drinking-water installations need WaterMark certification; structural steel and fasteners to AS/NZS standards with independent certification requested by builders; anti-dumping duties apply to some Indian steel products.	GEMS registration (importer); RCM or EESS registration where applicable; WaterMark certificate for plumbing valves and pumps; AS/NZS test reports; mill certificates; certificate of origin under the agreement.
EFTA	Switzerland: Machinery, Low Voltage, EMC and Pressure Equipment ordinances follow the EU rules; motor efficiency aligned with the EU; CE marking and EU declarations accepted under the EU–Swiss agreement; vehicle parts recognised through EU and UNECE approvals; no CBAM, no steel safeguard; industrial goods duty-free since 2024. Norway: EU harmonised rules through the EEA (Machinery Regulation from 20 January 2027, ecodesign for motors, RoHS, UNECE vehicle rules); Norwegian CBAM planned from 1 January 2027 for iron, steel and aluminium articles.	CE declaration of conformity and technical file; EN test reports; E-mark certificates; motor efficiency declaration; EN 10204 3.1 certificates; self-declared certificate of origin; embedded emissions data for Norway from 2027.
Oman	Directorate General of Standards and Metrology; Royal Oman Police for vehicle standards. Omani Quality Mark from 1 March 2026 for steel products and electrical components as listed (factory audit and testing); low-voltage electrical equipment needs a certificate of conformity from a notified body; GCC conformity for tyres; GSO standards for brake pads, filters and batteries; machinery, pumps, valves and motors to GSO and IEC standards and buyer specifications.	Certificate of conformity for electrical goods; Omani Quality Mark licence for listed products; IEC or GSO test reports; E-mark or ISO test reports for brakes; mill certificates; certificate of origin under the agreement.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
New Zealand	WorkSafe (electrical safety, machinery), EECA (energy efficiency), NZTA (vehicle standards), MBIE (Building Code). Three-phase motors from 0.73 kW to under 185 kW need energy-efficiency registration with EECA before sale (new rules from 1 May 2026, Australian registration recognised); medium-risk electrical articles need a supplier declaration of conformity and high-risk articles an approval; machinery to AS/NZS 4024; plumbing valves and pumps under the Building Code with WaterMark evidence; vehicle components fitted to vehicles must meet approved standards (UNECE, ADR, FMVSS, JIS); structural steel and fasteners to AS/NZS standards with independent certification.	EECA registration (importer); supplier declaration of conformity or approval evidence; IEC efficiency test reports; standards compliance evidence for vehicle parts; mill certificates; ISPM 15 packing declaration; certificate of origin under the agreement.

Who issues your certificate; which Council to join

Preferential Certificate of Origin: Export Inspection Agency or DGFT Regional Authority, Bhopal (as notified for the agreement); self-certification for the UK and EFTA, and for Status Holders under the New Zealand agreement. Council: EEPC India. Non-preferential certificates: chambers and EEPC.

Low-priority lines (small market or no duty advantage)

Market	Products
New Zealand	Articles of aluminium, n.e.s., Parts of liquid pumps, Parts of valves, Drive-axles with differential, Steering wheels & columns, Cast iron / steel articles
Australia	Cast iron / steel articles, Forged iron / steel articles
UAE	Forged iron / steel articles, Silencers & exhaust pipes
Oman	Steering wheels & columns, Road wheels & parts, Threaded articles, n.e.s., Cast iron / steel articles, Motorcycle parts, Forged iron / steel articles, Vehicle wiring sets, Silencers & exhaust pipes

B2 Pharmaceuticals

Where the State stands

Exports of USD 1,719.8 million in FY 2025-26, 22% of the State's exports and 5.5% of India's pharmaceutical exports, the State's highest share in any sector. Most finished medicines already entered the partner markets duty-free, so the agreements change little for formulations; the gains are in intermediates and specialty chemicals (pyridine, pyrimidine and pyrazole compounds, vitamins, hormones) where the EU and the UK charged 2 to 6%, and in immunological products in Australia (3%). In pharmaceuticals the hurdle is registration, since the duty was already zero in most markets; the agreements with the UK, Australia and EFTA add provisions that ease recognition of inspections and approvals, which the Council and the Helpdesk can explain.

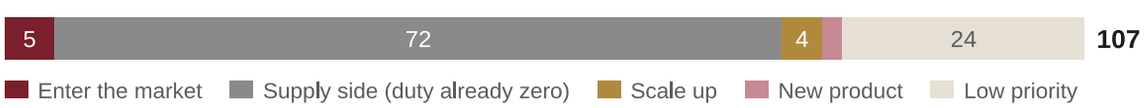

USD 1,719.8 mn	22%	107
Exports, FY 2025-26	of the State's exports	product-market lines examined

107 product-market lines examined; 85 were already duty-free before the agreements. 72 supply side, 5 to enter, 4 to scale up, 2 new products, 24 low priority.

EXHIBIT 4

Pharmaceuticals: 72 of 107 lines are supply side, where the duty was already zero

Product-market lines examined, by Department of Commerce classification, number of lines

For Norway, Switzerland and Iceland the Department of Commerce sheet gives the same import figure for all three countries, which appears to be the figure for the EFTA group [to confirm with the Department of Commerce]. Australia: the schedule carries only 0%, 4% and 5% rates; “5% or 0%” means the six-digit code covers lines at both rates (130219: 5% on ginger oleoresin). European Union: the chapter 29 and 30 rows were checked against the EU schedule (Appendix 2-A-1); the pharmaceutical lines are free already, and for 293319, 293339 and 293359 the 6% in the Department sheet is the 6.5% rate of one line in each sub-heading, the other lines being free; 2933 39 50 (4%) is removed in four annual steps from entry into force.

The rule of origin in this sector

Formulations made in the State from imported APIs usually qualify through a change in tariff heading (from chapter 29 to 3004) and a value content rule; an API made in the State from imported intermediates qualifies where the chemical reaction rule or the change in sub-heading applies. Repacking, relabelling or simple mixing does not confer origin. Keep batch records and the cost sheet.

- **UK (Annex 3A):** for chapters 28 to 30 and 32 (inorganic and organic chemicals, pharmaceuticals, dyes and pigments) the rule is a change in sub-heading, or the standard value content, or a chemical reaction in India (a new molecule); a formulation made from an imported API and an API made from imported intermediates both usually qualify. Chapters 33 to 39 have no value-content option: a change in heading or sub-heading, or a chemical reaction. Tolerance 12.5% of value.
- **UAE and Oman:** a change in sub-heading plus 40% value addition (UAE on FOB, 35% on ex-works; Oman by build-down, 35% by build-up). **Australia:** pharmaceuticals are not listed in Annex 4B, so the general rule applies: a change in sub-heading plus 35% build-up or 45% build-down of FOB. **New Zealand:** a change in sub-heading plus 45% of FOB for most of chapter 30 and for organic chemicals of chapter 29; immunological products of heading 3002 a change in sub-heading or 40%. **EFTA:** a change in sub-heading, or non-originating materials not above 65% of the ex-works price (60% of FOB) for chapter 30 and not above 60% (55%) for chapter 29. Under the UAE agreement the registration annex gives automatic marketing authorisation within 90 days for products already approved by the US FDA, UK MHRA, EMA or Japan's PMDA.
- **Herbal products and extracts:** plants grown in the State are wholly obtained; extracts made in India from Indian plants are produced from originating materials.

What the buyer and the border will ask for

Marketing authorisation from the regulator of the market (MHRA in the UK; EMA or national agencies in the EU; TGA in Australia; Swissmedic in Switzerland; Medsafe in New Zealand; MOHAP in the UAE; Ministry of Health in Oman); GMP certification and inspection; Certificate of Pharmaceutical Product (CoPP) from CDSCO; for herbal products, the food or supplement rules of the market apply.

Compiled from the regulators' own publications in October 2026; the importer's obligations are shown because the exporter has to supply the documents behind them. Clauses that could not be confirmed on the regulator's own publication have been left out; the Portal carries updates.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
United Kingdom	Medicines and Healthcare products Regulatory Agency. UK marketing authorisation (national route or international recognition of EU, US and other approvals); GMP compliance of the Indian site verified by MHRA or a recognised authority; UK importer with an importation authorisation and Qualified Person release; APIs enter only with a Written Confirmation from CDSCO for each shipment; English packaging and leaflet; herbal extracts as traditional herbal registrations or as food supplements; medical dressings as medical devices with MHRA registration and a UK Responsible Person (CE-marked devices accepted until 2028 or 2030).	Marketing authorisation dossier; GMP certificate or MHRA inspection; CDSCO Written Confirmation; CoPP; certificate of analysis per batch; stability data; free sale certificate; ISO 13485 and CE certificate for dressings; UK Responsible Person agreement.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
European Union	European Medicines Agency (centralised procedure compulsory for biotech products such as insulin and vaccines) and national agencies; EDQM for API certificates. Marketing authorisation before sale; EU GMP inspection of the site and entry in EudraGMDP; EU importer with a manufacturing and importation authorisation and Qualified Person release with import testing; APIs with a CDSCO Written Confirmation per site and ICH Q7 GMP; falsified medicines safety features (2D barcode, anti-tamper device); herbal medicines as traditional herbal medicinal products or food supplements; medical dressings under the Medical Devices Regulation with Notified Body CE marking, an EU authorised representative and EUDAMED registration.	CTD dossier; EU GMP certificate; CDSCO Written Confirmation; CEP or active substance master file; CoPP; certificate of analysis; stability data; State Licensing Authority GMP certificate; ISO 13485 and Notified Body certificate for dressings; EUDAMED registration and UDI.
UAE	Emirates Drug Establishment (Federal Decree-Law 38 of 2024). Registration of the Indian manufacturing site, then of each product (CTD dossier, GMP evidence from EDE, MOHAP or a recognised PIC/S authority, CoPP, Zone IV stability data, pricing approval, Arabic and English label and leaflet); the authorisation holder appoints a UAE pharmaceutical establishment for regulatory affairs and vigilance and licensed importers and distributors; biologics with lot release; medical dressings registered on the strength of CE, FDA or TGA approval with ISO 13485 and a UAE representative; herbal and health supplements registered as health products (Montaji in Dubai).	Company registration; product registration number; GMP certificate; CoPP and free sale certificate (attested by the UAE Embassy as commonly required); certificate of analysis; stability data; ISO 13485 and CE certificate for devices; local agent agreement.
Australia	Therapeutic Goods Administration. An Australian sponsor holds the ARTG entry before import; registered medicines (prescription products, antibiotics, insulin, vaccines) or listed complementary medicines (herbal extracts as permitted ingredients); GMP clearance for every overseas site, by desktop review of EU, PIC/S, MHRA or FDA evidence or by TGA inspection (Indian sites usually need an inspection or EU GMP certificates); labelling to TGO 91 and 92 with the sponsor's name; medical dressings included in the ARTG by the sponsor on conformity evidence (CE accepted).	ARTG number; TGA GMP clearance per site and dosage form; CTD dossier; CoPP; certificate of analysis; Zone IV stability data; ISO 13485 and CE certificate for devices; sponsor authorisation letter.
EFTA	Switzerland: Swissmedic marketing authorisation (full or reliance procedure on EMA or FDA approvals); Swiss importer or authorisation holder with an establishment licence and Responsible Person; GMP certificates from PIC/S or mutual-recognition authorities or a Swissmedic inspection; herbal medicines under the complementary medicines ordinance or as food supplements; medical dressings under the Medical Devices Ordinance with EU CE marking and a Swiss authorised representative. Norway: EU rules through the EEA, with the Norwegian Medical Products Agency for national authorisations, CDSCO Written Confirmation for APIs and serialisation.	CTD dossier; GMP certificates; CoPP; certificate of analysis; stability data; CDSCO Written Confirmation (Norway); Swiss representative agreement; ISO 13485 and Notified Body certificate for devices; importer's Swissmedic establishment licence.
Oman	Ministry of Health, Directorate General of Pharmaceutical Affairs and Drug Control. Registration of the Indian company and site first (GMP certificate, manufacturing licence, product list, possible inspection), then each product (CTD dossier, CoPP, GMP, certificate of analysis, Zone IVb stability, samples, Arabic and English label and leaflet, pricing against GCC references); applications only through a licensed Omani agent; biologics with lot release; CoPP and free sale certificate attested by the Omani Embassy.	Company registration; product registration number; CoPP; GMP certificate; free sale certificate; certificate of analysis; stability data; agent agreement; ISO 13485 and CE certificate for dressings.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
New Zealand	Medsafe (Medicines Act 1981). A New Zealand sponsor files a new medicine application and obtains consent before distribution (full, abbreviated or reliance pathway); GMP evidence for every manufacturing and packing site from a recognised regulator (TGA, FDA, EU authorities, MHRA, Swissmedic, Health Canada, PMDA, HSA), not older than three years, failing which a Medsafe audit at the applicant's cost; API sites also need GMP evidence; English labelling; medical dressings notified in the WAND database by the sponsor; herbal extracts as dietary supplements or as medicines if therapeutic claims are made.	New medicine application dossier (CTD); GMP certificates from recognised regulators or a Medsafe audit report; CoPP; certificate of analysis; stability data; WAND notification (sponsor); ISO 13485 and CE certificate for devices; free sale certificate.

Who issues your certificate; which Council to join

Preferential Certificate of Origin: Export Inspection Agency or DGFT Regional Authority, Bhopal; self-certification for the UK and EFTA, and for Status Holders under the New Zealand agreement. Council: Pharmexcil (also issues non-preferential certificates and the RCMC). CDSCO zonal office for CoPP and export NOCs.

Low-priority lines (small market or no duty advantage)

Market	Products
European Union	Organic compounds, n.e.s.
New Zealand	Medicinal plants & herbs, Penicillin medicaments, Vitamin medicaments, Vitamins & derivatives, Pyrimidine compounds, Medicaments, bulk, Other antibiotics, Pyridine heterocyclics, Organic compounds, n.e.s., Steroidal hormones, Pyrazole heterocyclics, Penicillins & derivatives, Erythromycin & derivatives
United Kingdom	Pyrazole heterocyclics, Organic compounds, n.e.s.
UAE	Pyridine heterocyclics, Pyrimidine compounds, Pyrazole heterocyclics
Oman	Pyridine heterocyclics, Organic compounds, n.e.s., Medicinal plants & herbs, Pyrimidine compounds, Pyrazole heterocyclics

B3 Agriculture and food

Where the State stands

Exports of USD 1,461.6 million in FY 2025-26, 19% of the State's exports and 3.9% of India's agricultural exports. This is the sector where the agreements differ most. The UK (94% of lines), Australia and New Zealand (100%), Oman (91%) and the UAE (88%) open almost everything; the EU opens 75% of lines with quotas on 12%; EFTA opens only 40% with quotas on 17% and excludes 44%, mostly in processed food. The largest gains are in processed food: namkeen and food preparations (duties of 1 to 6% removed in markets that import USD 25 billion of them), biscuits, sauces, puffed cereals, and fresh produce in the UK (garlic 72%, tomatoes 25%, oranges 22%, bananas 15%). In Norway and Switzerland several processed-food lines keep a calculated or reduced duty under the EFTA schedules; the table marks them. In every case the border requirement (pesticide residues, plant health, food safety registration) decides whether the shipment gets in; the duty is the second question.

Checked against the Norway, Switzerland and Iceland schedules (Annexes 2.E, 2.F and 2.D of the EFTA agreement). PAP*: Norway keeps a calculated duty on processed foods such as namkeen, sauces and sweet biscuits, based on the difference between Norwegian and world raw-material prices and published by Norway; it is not nil. Norway: tomatoes nil from 1 November to 9 May and from 15 to 31 October, 112% to 119% in season; potatoes keep 85% or 162% by season; preserved vegetables of 200599 keep 244.8%, nil only for capers, artichokes and sweet peppers. Switzerland: “MFN less 60” and “MFN less 44” are reductions from the MFN duty in Swiss francs per 100 kg and are not nil; namkeen and food preparations of 210690 are nil except the lines containing fat (MFN less 44); tomatoes nil from 21 October to 30 April or within tariff quota 15; potatoes nil within quota 14, otherwise not covered; maize nil within quota 28 for food use; preserved vegetables of 200599 nil within quota 14 for potato mixtures, 10% to 24.5% otherwise; soya beans nil except for feed or edible-oil production; puffed and roasted cereals nil, muesli-type preparations MFN less 44; edible oils of 151590 are not covered; bananas are not covered. Iceland: sweet biscuits nil ad valorem plus 17 to 31 ISK per kg; potatoes nil for baking potatoes of 65 mm and above, others not covered. Rows marked “Confirm the line (see note)” need the exact eight-digit line checked on the partner’s tariff before quoting. The duty-before figures for these three countries are the Department of Commerce figures; the schedules state no base rates.

The Department of Commerce sheet shows the EU duty falling to zero on bananas, rice, garlic, honey and milk powder. The agreement as concluded keeps the EU’s duties on these products, so those seven rows are listed separately below. The EU schedule published by the Commission in February 2026 (Appendix 2-A-1) excludes skimmed milk powder (category X) and gives ghee a quota of 1,000 tonnes a year at half the duty, with the full duty outside it; the Commission’s summary of the agreement states that no concession is granted on rice, bananas, honey or soft wheat and that the EU keeps its tariff on garlic. The schedule lines for those products could not be read here and are marked “line to confirm”; the EU row for wheat flour keeps its “confirm” mark. Under the UK agreement paddy, brown and broken rice are duty-free from entry into force and milled rice (1006.30) is excluded (Appendix 2A-b of the agreement).

EU lines shown as duty-free in the Department of Commerce sheet but kept dutiable in the concluded agreement

HS	Product	Market	Partner imports (USD mn)	Duty before (sheet)	Duty after (sheet)	Status
080390	Bananas	European Union	6,392	15%	0%	No concession (Commission summary) [line to confirm]

HS	Product	Market	Partner imports (USD mn)	Duty before (sheet)	Duty after (sheet)	Status
100630	Semi/wholly milled rice	European Union	2,501	22%	0%	No concession (Commission summary) [line to confirm]
040210	Skimmed milk powder	European Union	1,854	17%	0%	Excluded (category X): EU duty stays; the duty is a specific duty, not 17%
040900	Natural honey	European Union	918	17%	0%	No concession (Commission summary) [line to confirm]
070320	Garlic, fresh or chilled	European Union	736	72%	0%	EU keeps its tariff (Commission factsheet) [line to confirm]
100640	Broken rice	European Union	552	18%	0%	No concession (Commission summary) [line to confirm]
100610	Paddy / rice in husk	European Union	97.8	30%	0%	No concession (Commission summary) [line to confirm]

Lines already duty-free: compete on supply

20 lines where the partner already charged no duty on the Indian product. The agreement adds nothing on duty; it may still help through cumulation, customs facilitation and recognition of standards. No certificate of origin is needed for these lines.

HS	Product	Market	Partner imports (USD mn)	Duty	What to do
100590	Maize (excl. seed)	European Union	7,631	0%	Supply side
190531	Sweet biscuits	European Union	4,330	0%	Supply side

100630	Semi/wholly milled rice	New Zealand	66.9	0%	Supply side

HS	Product	Market	Partner imports (USD mn)	Duty	What to do
100590	Maize (excl. seed)	UAE	52.2	0%	Supply side
151590	Soybean & fixed veg oils	Australia	50.6	0%	Supply side

For Norway, Switzerland and Iceland the Department of Commerce sheet gives the same import figure for all three countries, which appears to be the figure for the EFTA group [to confirm with the Department of Commerce]. Australia: duty-before figures are the Department of Commerce figures. The Australian schedule carries only 0%, 4% and 5% rates; where a six-digit code covers lines at two rates the table shows both (130219: 5% on ginger oleoresin; 210610: 5% on textured protein, 0% on concentrates; 300214, 300215 and 210690: by line). Sweet biscuits (190531) appear in the table above because the schedule gives a 5% base rate eliminated at entry into force. Every Australian line in these tables is nil for Indian goods in 2026, either from entry into force or, for the phased steel and fastener lines (7308, 7318, 7326), from 1 January 2026 (Customs Tariff Amendment (India-Australia ECTA Implementation) Act 2022, Schedule 10A). Lines in chapters 32 to 87 were checked against the Act; the schedule pages for those chapters were not readable here.

The rule of origin in this sector

Products grown in the State are wholly obtained and qualify without a value calculation; processed foods made from Indian grain, pulses, oil, sugar and spices qualify as made from originating materials. Where an imported input is used (palm oil, imported sugar, flavours, packaging is not counted), check the product-specific rule: most processed-food lines ask for a change in tariff heading or chapter, and some agreements limit the weight of non-originating sugar or dairy. Keep purchase records that show the Indian origin of the main inputs.

- **UK (Annex 3A):** live plants, vegetables, fruit, cereals, oilseeds, spices and plant materials of chapters 1 to 14 must be wholly obtained (a crop grown in India from imported seed still originates; only the coffee and tea lines of chapter 9 have a change-in-classification rule); gums, resins and extracts of chapter 13 and milled products of chapter 11 a change in chapter; oils of chapter 15 a change in heading plus the standard value content, except fixed vegetable oils of 1515, a change in chapter; chapter 16 and most sugar confectionery a change in chapter; cereal preparations of chapter 19 a change in chapter with non-originating cereals and flour (chapters 10 and 11) not above 30% of value or weight (60% for puffed and flaked cereals of 1904); biscuits and bakers' wares of 1905 a change in heading; preparations of vegetables and fruit of chapter 20 a change in heading plus the standard value content; sauces of 2103 a change in sub-heading; namkeen and other food preparations of 2106 a change in heading; soybean oilcake of 2304 a change in chapter (groundnut and other oilcake of 2305 and 2306 a change in heading plus the standard value content). Tolerance 7.5% for chapters 1 to 3, 5, 6, 10 and 14 and 12.5% for chapters 4, 7 to 9, 11 to 13 and 15 to 24, by value or weight.
- **UAE and Oman:** cereals, oilseeds, honey and most fresh produce must be wholly obtained; spices and vegetable oils a change in sub-heading plus 40% value addition; cereal preparations, biscuits, namkeen and sauces a change in heading plus 40% (under the Oman agreement biscuits and puffed cereals may instead show a change in chapter excluding chapter 11); preserved vegetables and fruit, and oilcake and feed, a change in chapter plus 40%. **Australia:** cereals, oilseeds, pulses and spices wholly obtained; puffed cereals a change in chapter; other processed foods, including namkeen, sauces, biscuits, vegetable oils and oilcake, are not listed in Annex 4B and follow the general rule (a change in sub-heading plus 35% build-up or 45% build-down). **New Zealand:** cereals, oilseeds, spices and produce wholly obtained; cereal preparations, biscuits, sauces, namkeen and preserved vegetables a change in chapter (chapter 20 with non-originating vegetables and fruit not above 10% of the value; 2106 excluding dairy of chapter 4); vegetable oils a change in sub-heading plus 45%; oilcake a change in heading with non-originating materials not above 20% of the value.

- **EFTA (Appendix 2.A.1):** cereals, oilseeds, spices and most produce of chapters 1 to 14 must be wholly obtained; biscuits and most preparations of chapter 21 (namkeen, sauces) a change in heading; preparations of vegetables and fruit of chapter 20 and fixed vegetable oils of 1515 a change in chapter; puffed cereals a change in sub-heading with non-originating materials not above 65% of the ex-works price; oilcake a change in heading with non-originating materials not above 60%. Tolerance 10% of the ex-works or FOB value. **EU:** the EU's agreements usually set weight-based tolerances for agricultural chapters and limit the non-originating sugar or dairy in processed foods, and the concluded agreement keeps the EU's duties on rice, sugar, honey, garlic, bananas, soft wheat and milk powder; check the published text before planning those lines for the EU.

What the buyer and the border will ask for

Pesticide residue limits (MRLs) and contaminants of the market; a phytosanitary certificate from the Plant Quarantine station for plant products; a health certificate from the Export Inspection Agency or APEDA for processed foods where the market asks for it; food business registration with the importing country (FSA and local authority in the UK; FSANZ standards and Department of Agriculture import conditions in Australia; MPI in New Zealand; Dubai Municipality and MOCCAE in the UAE; EU establishment listing for products of animal origin); Halal certification for the UAE and Oman; Arabic labelling in the Gulf; organic certification where sold as organic.

Compiled from the regulators' own publications in October 2026; the importer's obligations are shown because the exporter has to supply the documents behind them. Clauses that could not be confirmed on the regulator's own publication have been left out; the Portal carries updates.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
United Kingdom	Food Standards Agency and Defra. GB food law: English labelling with the GB importer's address, allergens and nutrition; GB pesticide residue limits; contaminant limits. Spices (0909, 0910), chilli, okra and drumsticks: official certificate from the Spices Board or APEDA plus an accredited laboratory report with every consignment, 20% checks at the border. Fresh produce: phytosanitary certificate; onions, potatoes and tomatoes face plant-health restrictions, check the UK Plant Health Portal. Honey: health certificate from EIC, GB-listed establishment. Ghee and milk powder: India has no approved milk residue plan, so dairy cannot enter at present. Soybean meal as feed: importer registered for feed; non-GM status is a selling point.	IPAFFS pre-notification by the importer; Spices Board or APEDA official certificate and laboratory report; EIC health certificate (honey); phytosanitary certificate (PPQS); certificate of analysis (pesticides, aflatoxin, ethylene oxide, Sudan dyes); organic certificate; origin declaration under the agreement.
European Union	DG SANTE and the Member State authorities. EU food law: traceability through the EU importer; labelling in the national language; pesticide residue limits (ethylene oxide 0.1 mg/kg in spices); contaminant and additive rules (Sudan dyes prohibited); Salmonella criteria. Spices, sauces and condiments (2103), botanical supplements, chilli and drumsticks: official certificate plus laboratory report with every consignment (20 to 30% checks); rice and okra under increased checks. Basmati: zero-duty quota with the EIC certificate of authenticity. Organic: NPOP equivalence runs to 31 December 2026, then certification by an EU-recognised body. Honey: EU-listed establishments; dairy not permitted. Soybean products: deforestation regulation from 30 December 2026.	TRACES pre-notification by the importer; Spices Board or EIC official certificate and ISO 17025 laboratory report; EIC health certificate (honey) and certificate of authenticity (basmati); phytosanitary certificate; organic certificate of inspection; certificate of analysis; farm geolocation data for soybean products.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
UAE	MOCCAE, Dubai Municipality and ADAFSA. Product and label registration before import (FIRS, ADAFSA, ZAD); GSO 9 labelling in Arabic with production and expiry dates, lot number, origin, allergens and nutrition; GSO pesticide, contaminant and microbiological limits; health certificate from the Indian competent authority with every consignment; honey and dairy under ECAS or EQM with a veterinary health certificate (Indian dairy accepted from EIC-certified plants); fresh produce: phytosanitary certificate and MOCCAE import permit where required; animal-derived ingredients need halal evidence.	Health certificate (EIC or APEDA as the importer specifies); phytosanitary certificate; certificate of origin under the agreement; certificate of analysis; halal certificate where animal-derived; approved Arabic label artwork; packing list.
Australia	Department of Agriculture (BICON, Imported Food Inspection Scheme) and FSANZ. Import conditions by product: rice as hulled grain with inspection; wheat flour as a processed product; whole pulses and whole spice seeds treated as viable seed (permit, treatment) unless processed or ground; fresh garlic and ginger restricted; fresh produce only mango and pomegranate; soybean meal as stockfeed with permit and heat treatment; dairy with permit and specified heat treatment; honey free of comb and wax. Food inspection on arrival (risk foods 100% initially); labelling under the Food Standards Code in English with the importer's name; residue limits (zero tolerance where no Australian limit).	Import permit where required; phytosanitary certificate with additional declarations; treatment certificate; manufacturer's declaration for processed foods; certificate of analysis (pesticides, aflatoxin, Salmonella, Sudan dyes); packing declaration; certificate of origin under the agreement.
EFTA	Switzerland: Federal Food Safety and Veterinary Office; EU-aligned food law; labelling in German, French or Italian with the country of production; official certificate and laboratory report for Indian spices, sauces and condiments and chilli; phytosanitary certificate for fresh produce; honey from EU-listed establishments; dairy not permitted; cereals and rice under tariff quotas and import permits of the Federal Office for Agriculture. Norway: Mattilsynet; EU food law through the EEA with the same Indian entries; importer registration and 24-hour pre-notification; labelling in Norwegian; high agricultural tariffs with the agreement's concessions on selected lines.	TRACES pre-notification (importer); EIC health certificate (honey); Spices Board official certificate and laboratory report; phytosanitary certificate; organic certificate with Swiss or EU recognition; certificate of analysis; self-declared certificate of origin; Swiss import permit for cereals (importer).
Oman	Food Safety and Quality Centre (Ministry of Agriculture, Fisheries and Water Resources). Product registration and label approval before sale; GSO 9 Arabic labelling with production and expiry dates, lot, origin, allergens and nutrition; GSO residue, contaminant and microbiological limits; health certificate from the Indian competent authority with every consignment; veterinary certificate for dairy and honey; phytosanitary certificate and agricultural quarantine clearance for fresh produce, rice, pulses and spices; halal certificate for animal-derived ingredients; Omani Quality Mark for edible oils, sugar products and food additives from 1 March 2026.	Health certificate (EIC or APEDA); veterinary certificate (EIC); phytosanitary and fumigation certificates; certificate of analysis; halal certificate; certificate of origin under the agreement; Arabic label artwork; product registration.
New Zealand	Ministry for Primary Industries. The importer must be an MPI-registered food importer; every product needs an Import Health Standard: rice, wheat flour, pulses and dried spices under the stored plant products standard (whole seeds need treatment or a permit); fresh produce only mango; processed foods (biscuits, namkeen, sauces) low risk with ingredient declarations; soybean meal as stockfeed with heat treatment and permit. Dried chilli, paprika and pepper need food safety clearance with laboratory testing. Labelling under the Food Standards Code in English; New Zealand residue limits (default 0.1 mg/kg).	Phytosanitary certificate with additional declarations; treatment certificates; MPI import permit where required; manufacturer's declaration; certificate of analysis (Salmonella, aflatoxin, Sudan dyes, pesticides); biosecurity clearance (importer); certificate of origin under the agreement.

Who issues your certificate; which Council to join

Preferential Certificate of Origin: Export Inspection Agency, APEDA (for its scheduled products where notified), Spices Board (for scheduled spices), DGFT Regional Authority, Bhopal; self-certification for the UK and EFTA, and for Status Holders under the New Zealand agreement. Councils and boards: APEDA, Spices Board, SOPA (soybean), FIEO.

Low-priority lines (small market or no duty advantage)

Market	Products
Norway	Natural honey, Onion, fresh or chilled, Broken rice, Ghee & milk fats, Paddy / rice in husk
Switzerland	Natural honey, Onion, fresh or chilled, Broken rice, Ghee & milk fats, Paddy / rice in husk, Mustard / rapeseed oilcake
UAE	Medicinal plants & seeds, Natural honey, Soybean & fixed veg oils, Mustard / rapeseed oilcake
New Zealand	Puffed & roasted cereal foods, Soy protein concentrates, Soybean & fixed veg oils, Preserved vegetable prep., Medicinal plants & seeds, Oranges, fresh or dried, Wheat / meslin flour, Skimmed milk powder, Ginger, whole, Ghee & milk fats, Broken rice, Natural gums, resins & lac, Tomatoes, fresh or chilled, Dried shelled beans, Onion, fresh or chilled, Coriander, crushed / ground, Mustard seeds, Linseed, Natural honey, Coriander seeds, whole, Maize (excl. seed), Paddy / rice in husk, Potatoes, fresh (excl. seed), Mustard / rapeseed oilcake
Oman	Sauces & mixed condiments, Natural honey, Medicinal plants & seeds, Soybean & fixed veg oils, Mustard / rapeseed oilcake
Iceland	Onion, fresh or chilled, Ghee & milk fats
United Kingdom	Ghee & milk fats, Paddy / rice in husk

B4 Textiles and apparel

Where the State stands

Exports of USD 1,291.1 million in FY 2025-26, 17% of the State's exports and 3.6% of India's textile and handicraft exports; Madhya Pradesh supplies 6.9% of India's textile exports to the EFTA countries. Every textile and apparel line enters all seven markets duty-free. The gain is largest in garments and home textiles, where the UK charged up to 12%, the EU 12%, Australia 5 to 10% and Norway 10 to 11%. Cotton yarn and grey fabric gain little in duty but gain customers, because garment makers in the partner countries can now use Indian fabric and still meet the rule of origin through cumulation. The 190 low-priority lines are small markets (Oman, New Zealand, Iceland) for yarn and fabric; the product itself is competitive.

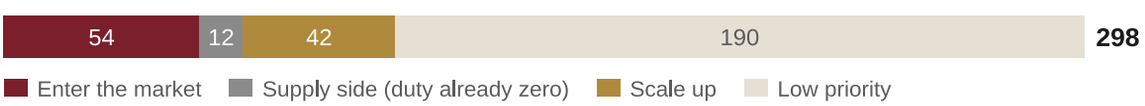

USD 1,291.1 mn	17%	298
Exports, FY 2025-26	of the State's exports	product-market lines examined

298 product-market lines examined: 54 to enter, 42 to scale up, 12 supply side, 190 low priority.

EXHIBIT 6

Textiles and apparel: 108 of 298 lines to act on; 190 low priority

Product-market lines examined, by Department of Commerce classification, number of lines

610442	Knitted cotton dresses	Iceland	54.7	0%	Supply side
610442	Knitted cotton dresses	Switzerland	54.7	0%	Supply side

Switzerland: the Department of Commerce sheet shows duties of 1 to 4% on the Swiss rows; Switzerland abolished its duties on industrial goods from 1 January 2024 (chapters 25 to 97, except some products of chapters 35 and 38 counted as agricultural; SECO), so these lines are shown as already duty-free. For Norway, Switzerland and Iceland the Department of Commerce sheet gives the same import figure for all three countries, which appears to be the figure for the EFTA group [to confirm with the Department of Commerce].

The rule of origin in this sector

Textile rules differ by agreement. Under the UK, UAE, Australia, Oman and New Zealand agreements the rule is a change in tariff classification plus a value content: fabric becoming a garment meets the change, so a garment cut and sewn in Indore from imported fabric qualifies if enough value is added in India (40% of the ex-works price under the UK agreement, 40% of FOB under the UAE, Oman and New Zealand agreements, 45% build-down or 35% build-up under the Australia agreement). Under the EFTA agreement garments and made-ups of chapters 61 to 63 need only a change in chapter, so a garment cut and sewn in India from imported fabric qualifies without a value test (a few headings, such as 6101, 6103, 6201 and 6301, need a change in sub-heading with non-originating materials not above 60% of the ex-works price); yarns and fabrics of chapters 50 to 60 need a change in sub-heading with non-originating materials not above 60%. The EU's agreements usually require two stages of manufacture in India (yarn into fabric, or fabric into a garment with the fabric made in India or the partner); check the published EU text before accepting an order for that market. Each agreement allows a small share of non-originating fibre or yarn by weight. Check the chapter 50 to 63 rules for the agreement before accepting an order; the Textiles Committee and the Helpdesk can confirm.

- **UK (Annex 3A):** chapters 50 to 63 generally require a change in tariff heading plus the standard value content (40% of ex-works or 45% of FOB build-down, or 35% build-up). A garment cut and sewn in India from imported fabric meets the heading change (fabric of chapters 50 to 55 into garments of chapters 61 or 62); it qualifies if the value added in India reaches the threshold. Tolerance 12.5% of value.
- **UAE:** a change in heading plus 40% value addition on FOB for garments and made-ups, a change in sub-heading plus 40% for yarns and fabrics; tolerance for non-originating fibre or yarn 7% by weight or 10% by value. **Australia:** textiles and garments are not listed in Annex 4B (only raw

cotton, wholly obtained), so the general rule applies: a change in sub-heading plus 35% build-up or 45% build-down; tolerance 10% by weight. **Oman:** a change in heading plus 40% value addition for garments and made-ups; a change in sub-heading plus 40% for yarns and fabrics (35% for the polyester and viscose yarns and fabrics listed in Annex 3B); tolerance 10% by weight or value. **New Zealand:** yarns, fabrics, garments and made-ups need a change in heading plus 40% value content (build-down; 30% build-up); tolerance 10% by weight or value.

- **EFTA (Appendix 2.A.1):** chapters 61 to 63 a change in chapter, so imported fabric may be used; chapters 50 to 60 a change in sub-heading with non-originating materials not above 60% of the ex-works price (55% of FOB); tolerance 10% of value. **EU:** to be confirmed from the published text; the EU's usual textile rules require two stages of manufacture. The Textiles Committee pre-verifies a product before its first certificate (valid one year or 100 certificates).

What the buyer and the border will ask for

Fibre content and care labelling in the language of the market; REACH (EU) and UK REACH limits on azo dyes, formaldehyde and other restricted substances; flammability rules for children's nightwear in the UK, EU, Australia and New Zealand; buyer requirements such as OEKO-TEX, GOTS for organic cotton, BCI, SMETA or amfori BSCI social audits; GI labelling for Chanderi and Maheshwari; from 2027 the EU's rules on textile waste and design will reach suppliers through buyers.

Compiled from the regulators' own publications in October 2026; the importer's obligations are shown because the exporter has to supply the documents behind them. Clauses that could not be confirmed on the regulator's own publication have been left out; the Portal carries updates.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
United Kingdom	Office for Product Safety and Standards; HSE for UK REACH. Fibre composition labelling (names and percentages in English); general product safety and traceability; UK REACH restrictions on azo dyes, chromium VI in trims, nickel, phthalates and PFOA; flammability labelling for nightwear; fire safety rules for upholstered items and cushions; cord and drawstring rules for children's clothing (BS EN 14682); carpets tested for flammability at the buyer's request.	Test reports (azo dyes, formaldehyde, pH, phthalates, flammability); fibre composition declaration; care label; GI or Handloom Mark documents for Chanderi and Maheshwari where the buyer asks; origin declaration under the agreement.
European Union	Member State market surveillance; ECHA. Textile labelling regulation (fibre names and percentages in the national language); general product safety regulation with an EU-established responsible operator named on the product; REACH restrictions (azo dyes, chromium VI, nickel, phthalates, PFAS, formaldehyde, CMR substances in clothing); children's cords (EN 14682); carpets fixed to floors under the Construction Products Regulation (CE marking); ecodesign rules for textiles with a digital product passport planned for late 2027.	Fibre composition declaration; test reports; EU importer or authorised representative details on the product; declaration of performance for fixed carpets; GI or Handloom documents where asked.
UAE	Ministry of Industry and Advanced Technology. Cabinet Resolution 54 of 2019 (textile products): clothing, knitted fabrics, home textiles and products at least 80% textile must be registered under ECAS by the UAE importer with a certificate of conformity before customs release; restricted substances and heavy metals (azo dyes, formaldehyde, pH), flame resistance for children's items; labels with fibre percentages, care, storage, batch code, country of manufacture, manufacturer and importer, conformity mark; no images against public order.	ECAS registration and certificate of conformity (per product family, obtained by the importer); accredited laboratory test reports; fibre composition declaration; care label; certificate of origin under the agreement.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
Australia	ACCC and state fair trading. Care labelling information standard (care instructions in English or the international symbols) for clothing, household textiles and piece goods; children's nightwear fire-hazard labelling (AS/NZS 1249); country-of-origin trade description in English; fibre content labelling voluntary but claims must be accurate; retailer limits on azo dyes and formaldehyde; carpets and jute or wool goods inspected for biosecurity contamination.	Care label; nightwear fire-hazard label; origin label; test reports (flammability, colour fastness); packing declaration; certificate of origin under the agreement.
EFTA	Switzerland: no compulsory fibre, care or origin labelling (if labelled, accurate and in a national language); Product Safety Act; chemical restrictions mirroring REACH (azo dyes, formaldehyde, PFAS, nickel); duty-free regardless of origin since 2024. Norway: EU textile labelling (fibre names in Norwegian), general product safety with an EEA responsible operator, REACH restrictions and Norwegian PFAS rules; carpets fixed as flooring under the Construction Products Regulation.	Test reports (azo dyes, formaldehyde, pH); fibre composition declaration (Norway); EEA importer details on the product (Norway); self-declared certificate of origin.
Oman	Directorate General of Standards and Metrology; Consumer Protection Authority. GSO textile standards on fibre content and care labelling; children's clothing cord safety; labels in Arabic or English with fibre composition, origin, care and importer details; cultural restrictions on prints.	Fibre composition and care labels; test reports (azo dyes, formaldehyde); certificate of origin under the agreement; commercial invoice and packing list.
New Zealand	Commerce Commission (Fair Trading Act). Fibre content labelling; country of origin on new clothing; care labelling on clothing, household fabrics and furnishings; children's nightwear reduced-fire-hazard standard (AS/NZS 1249); retailer limits on azo dyes and formaldehyde; carpets and jute, wool or cotton goods inspected for soil, seeds and insects; wool under its own import health standard.	Fibre, origin and care labels in English; nightwear compliance evidence; test reports; packing declaration (ISPM 15); certificate of origin under the agreement.

Who issues your certificate; which Council to join

Preferential Certificate of Origin: Textiles Committee (textiles and made-ups), Export Inspection Agency, DGFT Regional Authority, Bhopal; Development Commissioner (Handicrafts) for handicrafts; Central Silk Board for silk; self-certification for the UK and EFTA, and for Status Holders under the New Zealand agreement. Councils: AEPC (garments), TEXPROCIL (cotton textiles), SRTEPC (man-made fibre textiles), HEPC (handloom), EPCH (handicrafts), CEPC (carpets).

B5 Chemicals

Where the State stands

Exports of USD 415.7 million in FY 2025-26, 5% of the State's exports and 1.5% of India's chemical exports. Most chemical lines already entered the partner markets duty-free, so 58 of the 115 lines are supply-side lines where registration and price decide. The duty gains are in Australia (herbicides and fungicides 3%, insecticides, chemical preparations), the UAE and Oman (5% on most lines), and the EU (organo-sulphur compounds 6%, titanium dioxide pigments 3%). Agrochemicals need product registration in every market before a single consignment moves; that is the first step, and the Council can guide it.

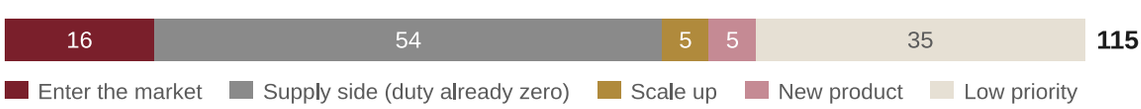

USD 415.7 mn	5%	115
Exports, FY 2025-26	of the State's exports	product-market lines examined

115 product-market lines examined: 54 supply side, 16 to enter, 5 to scale up, 5 new products, 35 low priority (small markets such as Iceland and New Zealand).

EXHIBIT 7

Chemicals: 54 of 115 lines are supply side; 16 to enter

Switzerland: the Department of Commerce sheet shows duties of 1 to 4% on the Swiss rows; Switzerland abolished its duties on industrial goods from 1 January 2024 (chapters 25 to 97, except some products of chapters 35 and 38 counted as agricultural; SECO), so these lines are shown as already duty-free. For Norway, Switzerland and Iceland the Department of Commerce sheet gives the same import figure for all three countries, which appears to be the figure for the EFTA group [to confirm with the Department of Commerce]. European Union: the chapter 29, 32, 34 and 35 rows were checked against the EU schedule (Appendix 2-A-1): printing ink, other inks, surfactants and polymer adhesives carry EU duties of 4% to 6.5% today, eliminated at entry into force, and are listed with the lines where the duty falls; titanium dioxide pigments carry 6%, not 3%; two lines of 293090 (6.5%) are removed in six annual steps. The schedule for chapter 38 could not be read here. Switzerland 382499 is in chapter 38: [confirm on the Swiss tariff that the line is not among the agricultural exceptions]. New Zealand 382499: the tariff order for the RCEP agreement shows one line of the sub-heading (3824.99.25) at 5%, the Department sheet 0% [confirm on the Working Tariff].

The rule of origin in this sector

Chemical rules usually offer a choice: a change in tariff sub-heading, a chemical reaction rule (a new molecule is produced in India), a purification or blending rule, or a value content. Formulated agrochemicals made from an imported technical grade usually qualify through the mixing-and-blending or value rule, provided the operation is more than simple dilution; check the rule for 3808. Caustic soda, soda ash and other products made from Indian raw materials are wholly obtained or produced.

- **UK (Annex 3A):** chapters 28 to 30 and 32 (inorganic and organic chemicals, pharmaceuticals, dyes and pigments): a change in sub-heading, or the standard value content, or a chemical reaction in India. Chapters 33 to 39 (essential oils, soaps, enzymes, agrochemicals and other chemical preparations, plastics) have no value-content option: a change in heading or sub-heading, or a chemical reaction; essential oils and perfumery of chapter 33 may also qualify by mixing and blending. Tolerance 12.5%.
- **UAE and Oman:** every chemical chapter from 28 to 39: a change in sub-heading plus 40% value addition (UAE on FOB, 35% on ex-works; Oman by build-down, 35% by build-up); caustic soda, soda ash and other products made from Indian raw materials are wholly obtained or produced. **Australia:** chemicals are not listed in Annex 4B, so the general rule applies: a change in sub-heading plus 35% build-up or 45% build-down. **New Zealand:** a change in sub-heading plus 45% of FOB for chapters 28, 29, 32, 35 and 38.
- **Agrochemicals (3808):** a formulation made from an imported technical-grade active ingredient usually qualifies through the change-in-sub-heading rule where the formulation is more than simple dilution or mixing (UK: a change in sub-heading or a chemical reaction; UAE and Oman: a change in sub-heading plus 40%; New Zealand: plus 45%); keep the formulation records. **EFTA (Appendix 2.A.1):** chapters 28 to 38 mostly a change in sub-heading, or non-originating materials not above 60% of the ex-works price (65% for pharmaceuticals; five points lower on FOB); where the listed rule cannot be met, a chemical reaction in India confers origin (Section I note to the Appendix). **EU:** check the published text.

What the buyer and the border will ask for

REACH registration (EU) and UK REACH for substances above one tonne a year; classification, labelling and safety data sheets under the GHS of the market; agrochemical registration (CRD/HSE in the UK, APVMA in Australia, MOCCAE in the UAE, EPA in New Zealand, EU Member State authorities); dangerous-goods packaging and transport rules; for food-contact or cosmetic inks and pigments, the product rules of the market.

Compiled from the regulators' own publications in October 2026; the importer's obligations are shown because the exporter has to supply the documents behind them. Clauses that could not be confirmed on the regulator's own publication have been left out; the Portal carries updates.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
United Kingdom	Health and Safety Executive. UK REACH registration by the GB importer or an Only Representative for substances above one tonne a year (caustic soda, soda ash, pigments, surfactants, adhesive monomers, activated carbon, non-food oleoresins), with transitional deadlines now 2029 to 2031; restrictions and SVHC notification; GB classification, labelling and safety data sheets in English; agrochemicals: GB active-substance approval and product authorisation held by a GB applicant, GB residue limits; biocidal uses need GB authorisation; food enzymes, detergents (biodegradability) and food-contact plastics and inks under GB food and detergent rules.	UK REACH registration number (through the Only Representative); GHS safety data sheet; certificate of analysis; HSE authorisation number for pesticide products; Indian CIB&RC registration; UN or ADR transport documents for caustic soda.
European Union	ECHA and the Member States. REACH registration of substances above one tonne a year by the EU importer or an Only Representative appointed by the Indian manufacturer; restrictions and SVHC communication; CLP classification and labelling in the national language with poison-centre notification for hazardous mixtures; plant protection products: EU active-substance approval and national product authorisation by an EU applicant, residue limits; biocides: approved active-substance supplier (Article 95 list) and product authorisation; detergents and surfactants: biodegradability now, and from 23 September 2029 the new Detergents Regulation with a digital product passport and an EU authorised representative; food enzymes and food-contact plastics and inks under EU food-contact rules; PFAS restrictions progressing.	REACH registration number (through the Only Representative); CLP-compliant safety data sheet; certificate of analysis; UFI and poison-centre notification (importer); CIB&RC registration and five-batch analysis for pesticide actives; Article 95 evidence for biocidal actives; declaration of compliance for food-contact plastics; OECD 301 biodegradability reports for surfactants.
UAE	MOCCAE for pesticides and fertilisers and for hazardous chemicals; MOIAT for detergents, paints and food-contact materials; Dubai Municipality and Civil Defence for storage. Pesticides: registration with MOCCAE before import by a MOCCAE-licensed company (Ministerial Decree 27 of 2018), import permit per consignment, imports only from the manufacturer; hazardous chemicals: importer licence with chemical activity, NOC where on the restricted list, GHS safety data sheets and labels in English and Arabic, approved storage; detergents and surfactant products under ECAS and Dubai Municipality registration; paints, inks and adhesives: lead and VOC limits under MOIAT regulations; food enzymes and oleoresins for food as registered additives.	MOCCAE pesticide registration and import permit (importer); CIB&RC registration and GLP five-batch analysis; GHS safety data sheet (English and Arabic); certificate of analysis per shipment; ECAS certificate for regulated consumer chemicals; storage approval (importer).
Australia	AICIS (industrial chemicals), APVMA (agricultural chemicals), Safe Work Australia (GHS 7), TGA (poisons scheduling), FSANZ (food uses). Industrial chemicals: the Australian importer registers with AICIS and categorises each chemical (listed, exempted, reported or assessed), with an assessment certificate for non-listed higher-risk chemicals; GHS Revision 7 labels and safety data sheets in English; consumer chemicals under the Poisons Standard (caustic soda Schedule 5 or 6); agrochemicals: APVMA approval of the active constituent (identity, impurities, five-batch analysis) and product registration through an Australian nominated agent, approved label and residue limits; food enzymes and oleoresins as permitted processing aids or additives; dangerous goods under the ADG Code.	AICIS registration and categorisation records (importer); GHS safety data sheet and label; certificate of analysis; APVMA approval and registration numbers; CIB&RC registration and GLP data; declaration of composition; UN packaging certificates.

Market	Regulator and mandatory requirements	Documents the buyer or the border will ask for
EFTA	Switzerland: Chemicals Ordinance (no REACH-type registration, but importer self-control, notification of new substances above one tonne, GHS-aligned classification, labels in two official languages for the public, safety data sheet in the recipient's language, product register notification for hazardous mixtures); restrictions mirroring REACH; plant protection products authorised by the Federal Food Safety and Veterinary Office with a Swiss applicant; biocides, detergents and food-contact plastics and inks under Swiss ordinances with positive lists. Norway: REACH and CLP through the EEA (registration through an EU or EEA importer or Only Representative), Norwegian Product Register declaration above 100 kg a year, plant protection products authorised by Mattilsynet, biocides and detergents under EU rules.	GHS safety data sheet (German, French or Italian for Switzerland; Norwegian for Norway); certificate of analysis; Swiss notification confirmation (importer); Swiss plant-protection authorisation number; CIB&RC registration and GLP data; declaration of compliance for food-contact plastics and inks; REACH registration (Norway); Norwegian Product Register number (importer).
Oman	Environment Authority (hazardous chemicals), Ministry of Agriculture (pesticides), Directorate General of Standards and Metrology (detergents, paints). Hazardous chemicals (caustic soda, acids, solvents, some surfactants): the Omani importer holds an environmental permit to handle hazardous chemicals and obtains an import permit for each consignment through Bayan, with a chemical safety card; pesticides: import permit per shipment from the Ministry of Agriculture (valid six months, applied before the purchase order) with the Indian registration attested by the Omani Embassy, safety data sheet, manufacturer's quality guarantee, standard sample of the active and analysis method, GLP purity analysis, Arabic and English label; fertilisers registered with the Ministry; detergents, paints and adhesives to GSO standards with Arabic labelling; food enzymes and oleoresins for food under additive rules and the Omani Quality Mark for food additives from 1 March 2026.	Environment Authority import permit (importer); GHS safety data sheet (Arabic and English); certificate of analysis; Ministry of Agriculture pesticide import permit; attested CIB&RC registration certificate; GLP five-batch analysis; certificate of origin under the agreement; Omani Quality Mark for food additives.
New Zealand	Environmental Protection Authority (HSNO Act), WorkSafe, MPI (agricultural compounds, food uses), NZ Customs. Every hazardous substance (caustic soda, many pigments, surfactants, adhesives, inks, agrochemicals) needs an HSNO approval or must fall under a group standard (surface coatings and colourants, cleaning products, adhesives) before import; the importer notifies the EPA within 30 days of first import and reports annually for agrochemicals; GHS-aligned labels and safety data sheets; agrochemicals also need ACVM registration by a New Zealand registrant and HSNO approval of the formulation; New Zealand residue limits; non-hazardous chemicals such as activated carbon and most enzymes fall outside HSNO, but food uses must be permitted processing aids or additives.	HSNO approval number or group standard reference (importer); EPA notification (importer); GHS safety data sheet and labels; certificate of analysis; ACVM registration (registrant); CIB&RC registration and GLP data; UN packaging certificates.

Who issues your certificate; which Council to join

Preferential Certificate of Origin: Export Inspection Agency or DGFT Regional Authority, Bhopal; self-certification for the UK and EFTA, and for Status Holders under the New Zealand agreement. Councils: Chemexcil (basic and specialty chemicals, agrochemicals, dyes), PLEXCONCIL (plastics), CAPEXIL (minerals and refractories).

Low-priority lines (small market or no duty advantage)

Market	Products
European Union	Caustic soda, solid, Other colouring pigments
UAE	Insecticides, Enzymes and prepared enzymes, Other inks, Disodium carbonate (soda ash), Plant protection products, Activated carbon, Fungicides, Caustic soda, solid, Herbicides & regulators, Insecticide formulations
Oman	Refractory cements & mortars, Polymer-based adhesives, Disodium carbonate (soda ash), Insecticides, Plant protection products, Printing ink, Enzymes and prepared enzymes, Organo-sulphur compounds, Extracted oleoresins, Fungicides, Insecticide formulations, Activated carbon, Caustic soda, solid, Caustic soda lye, Other inks, Other colouring pigments, Herbicides & regulators
United Kingdom	Caustic soda, solid, Other colouring pigments
Australia	Refractory cements & mortars, Other inks, Insecticide formulations, Other colouring pigments

Part C. How to claim the preferential duty: five steps

The agreement gives the lower duty to the importer, on the strength of a document the exporter provides. Five steps take a Madhya Pradesh exporter from the product to that document. Steps 1 to 3 are done once for each product and market; steps 4 and 5 are repeated for each consignment.

EXHIBIT 8

Five steps from the product to the proof of origin

Steps 1 to 3 are done once for each product and market; steps 4 and 5 for each consignment

Source: This Handbook, Part C

Step	Question	Where to look
1	What is my product's HS code?	Your customs broker; the Indian Customs tariff; the Trade Connect Tariff Explorer; an advance ruling from Customs if in doubt.
2	What duty does my buyer pay with and without the agreement?	Trade Connect Tariff Explorer; the partner's tariff (UK Integrated Online Tariff; EU Access2Markets; Australian Border Force working tariff; Swiss Tares; NZ Customs working tariff; UAE and Oman customs tariffs).
3	Does my product meet the rule of origin?	The product-specific rule for your HS line in the agreement's annex (Trade Connect carries the annexes); Annex 1 of this Handbook for the State's main lines; your cost sheet; this Part.
4	How do I get the proof of origin?	Trade Connect ePlatform, "Certificate of Origin": self-declaration (UK, EFTA; Status Holders under the New Zealand agreement) or application to a notified agency (UAE, Australia, Oman, New Zealand, older agreements). No proof is needed where the partner's MFN duty is already zero.
5	What happens at shipment and after?	Send the proof to the importer with the invoice; the importer claims at import; keep records for five years; answer any verification request.

Step 1. Find the HS code

The Harmonised System code identifies the product. The first six digits are the same in every country; India adds two digits (the ITC-HS code on your shipping bill) and partners add their own. The duty and the rule of origin are both set by the HS code, so an error here is an error everywhere. Use the eight-digit ITC-HS code from your shipping bills; confirm the six-digit code in the partner's tariff, because a product can be classified differently abroad (a part of a machine may be classified under the machine's heading in one country and under "parts" in another). If the classification is uncertain and the consignment is large, apply to Customs for an advance ruling, which binds Customs for three years.

Step 2. Check the duty with and without the agreement

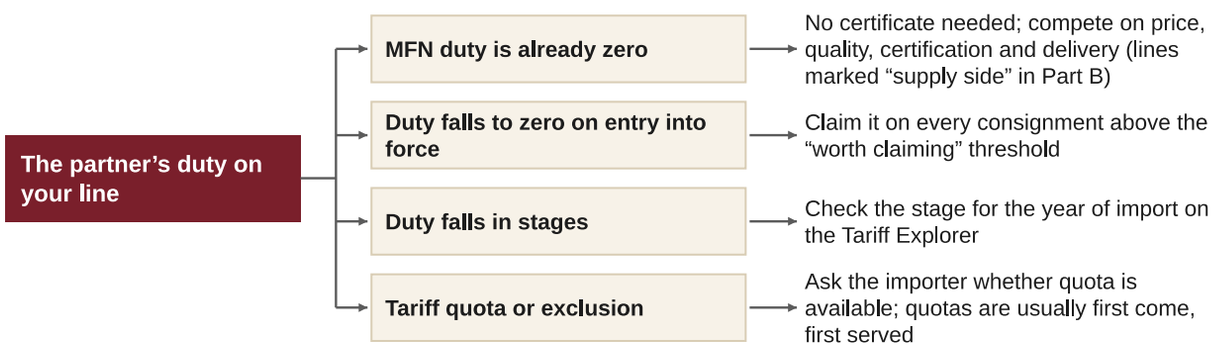

Look up the partner's MFN duty (the normal duty on imports from any country) and the preferential duty under the agreement for your six-digit line. Four cases arise.

Case	What it means	What to do
MFN duty is already zero	The agreement gives nothing on duty for this line (most pharmaceuticals, many chemicals and machinery lines in Europe and Australia).	No certificate needed. Compete on price, quality, certification and delivery. The tables in Part B mark these lines "supply side".
Duty falls to zero on entry into force	The common case for Madhya Pradesh products in the UK, UAE, Australia, Oman and New Zealand.	Claim it on every consignment above the "worth claiming" threshold below.
Duty falls in stages	Some lines reduce over 3 to 10 years (parts of the UAE, EFTA and EU schedules).	Check the stage for the year of import; the Tariff Explorer shows the schedule.
Tariff quota or exclusion	Some agricultural lines enter at the lower duty only within an annual quantity (EU, EFTA), or are excluded.	Ask the importer whether quota is available; quotas are usually first come, first served on the importing side.

EXHIBIT 9

The four cases at Step 2 and what to do in each

The partner's MFN duty and the preferential duty on your six-digit line

Source: This Handbook, Part C, Step 2

Step 3. Check the rule of origin

A product qualifies as Indian under an agreement in one of three ways.

1. **Wholly obtained or produced in India:** crops grown, minerals mined, animals raised and products made entirely from them. Soybean, wheat, spices, cotton, honey and milk from the State are wholly obtained; so are products made only from such inputs.
2. **Produced in India entirely from originating materials:** every input is itself Indian (or from the partner, through cumulation) under the agreement's rules.
3. **Produced in India from some non-originating materials that satisfy the product-specific rule** for the HS line. The rule is one or a combination of: a change in tariff classification (the imported input falls under a different chapter, heading or sub-heading from the product); a value content (a minimum share of the product's value added in India); or a specific process (a chemical reaction, spinning, weaving, melting and pouring).

The value content calculation

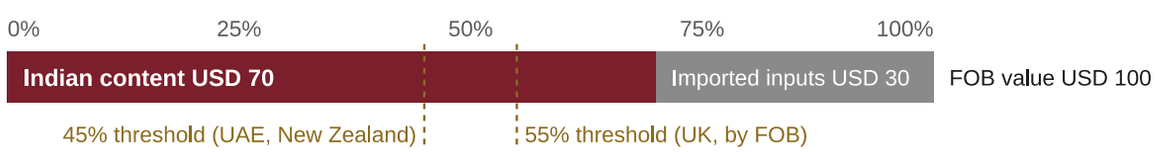

Two methods are used; the agreement states which one applies and the threshold (most of the recent agreements allow either method, each with its own threshold). The **build-down** method: (FOB value minus value of non-originating materials) divided by FOB value. The **build-up** method: value of originating materials and direct processing cost divided by FOB value. Some agreements use the ex-works price instead of FOB. Freight and insurance after the factory gate are excluded. Packing materials for retail sale are counted with the product; packing for transport is ignored.

Example. A brake assembly (HS 870830) made in Pithampur is sold at USD 100 FOB. It uses an imported sensor and imported alloy worth USD 30; Indian castings, machining, labour, overheads and profit make up the other USD 70. Build-down value content = (100 − 30) / 100 = 70%. The heading of the sensor (9032) and of the alloy (7601) differ from that of the brake assembly (8708), so a change in heading, and with it a change in sub-heading, is also met. Under the UAE agreement the rule for parts of chapter 87 is a change in tariff heading plus 45% value addition on FOB; under the UK agreement a change in heading alone, or 50% of ex-works (55% of FOB); under the New Zealand agreement a change in sub-heading plus 45%. The product qualifies under each.

EXHIBIT 10

A brake assembly at USD 100 FOB with USD 30 of imported inputs: 70% value content, above every threshold

Build-down method: (FOB value minus non-originating materials) ÷ FOB value; HS 870830, made in Pithampur

Build-down value content = (100 − 30) ÷ 100 = 70%

Heading changes: sensor 9032 and alloy 7601 become 8708

UAE	Change in tariff heading + 45% of FOB	**Qualifies**
United Kingdom	Change in heading alone, or 55% of FOB (50% ex-works)	**Qualifies**
New Zealand	Change in tariff sub-heading + 45%	**Qualifies**

Source: This Handbook, Part C, Step 3, worked example

Other rules that apply in every agreement

- **Tolerance (de minimis):** a small share of non-originating inputs may ignore the change-in-classification test: 10% of value under the UAE, Australia, EFTA, Oman and New Zealand agreements, 12.5% under the UK agreement for industrial goods and textiles (7.5% or 12.5% for farm products); for textiles the UAE allows 7% by weight, Australia 10% by weight, Oman and New Zealand 10% by weight or value. It does not relax a value-content rule.
- **Cumulation:** inputs from the partner count as originating. Fabric from a UK mill used in an Indore garment counts as Indian under the UK agreement; a Swiss compound used in a Ratlam intermediate counts under the EFTA agreement.
- **Minimal operations:** packing, labelling, cleaning, sorting, simple assembly, dilution or mixing that does not change the character of the goods never confers origin, whatever the value added.

- **Direct consignment:** the goods must travel from India to the partner without entering the commerce of a third country. Transshipment through Dubai, Singapore or Colombo is allowed if the goods stay under customs control; keep the through bill of lading and, if asked, a certificate of non-manipulation from the transit customs.
- **Accounting segregation:** where originating and non-originating inputs of the same kind are mixed in stock, the agreement allows an inventory-management method instead of physical separation; keep the records.
- **Keep the evidence:** cost sheets, supplier declarations for Indian inputs, import documents for foreign inputs, production records. The importing customs can ask for them for up to five years after the shipment. A cost-sheet and supplier-declaration template and the list of documents a verification asks for are in Annex 2.

Step 4. Get the proof of origin

All proofs of origin for India's agreements are issued on the Trade Connect ePlatform of the Department of Commerce (trade.gov.in), which replaced the earlier eCoO portal; a certificate issued any other way is not valid. The route depends on the agreement.

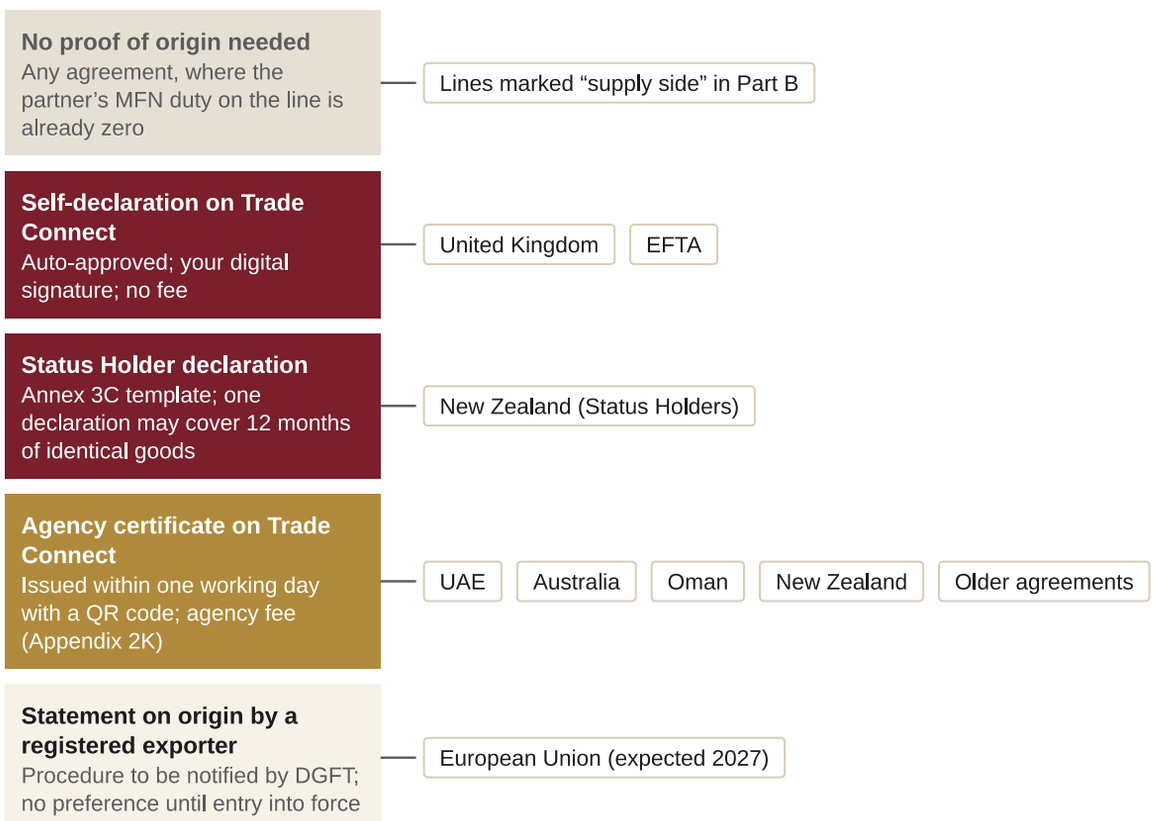

Agreement	Route	What you need
Any agreement, where the partner's MFN duty on the line is already zero	No proof of origin. The agreement gives nothing on duty for the line; the lines marked "supply side" in Part B are of this kind.	Nothing. Spend the effort on registration, standards and the buyer.
UK	Self-declaration: choose "India UK CETA (Self-Declaration)"; the application is auto-approved and you generate the certificate with your digital signature; no fee (DGFT Trade Notice 11/2026-27). The agency route ("Agency Issued") is also available. A UK importer may also claim on its own knowledge of origin, holding your documents. One declaration may cover repeated shipments of identical goods for a stated period of up to 12 months (box 10 of the Annex 3B template; the wording is in Annex 3 of this Handbook).	Trade Connect registration linked to your IEC; a Class 3 digital signature in the name of the authorised signatory, linked to the IEC; a scanned ink signature; invoice and packing list.
EFTA (Switzerland, Norway, Iceland, Liechtenstein)	Self-declaration: choose "India EFTA TEPA (Self-Declaration)"; auto-approved; generated with your digital signature; no fee (DGFT Trade Notice 13/2025-26). Agency route also available. Swiss customs checks the QR code.	As for the UK; keep the cost records for five years, since verification can be requested for five years.
New Zealand	Application to a notified agency on Trade Connect ("Agency Issued"); exporters recognised as Status Holders may instead make an origin declaration on the Annex 3C template, and may cover repeated shipments of identical goods for up to 12 months in one declaration (box 6).	Registration; digital signature or Aadhaar e-sign; invoice, packing list, cost sheet where asked; the agency's fee.

Agreement	Route	What you need
UAE, Australia, Oman, Mauritius, ASEAN, Japan, Korea, Singapore, Malaysia, Sri Lanka, SAFTA, APTA, Chile, MERCOSUR	Application to a notified agency on Trade Connect; the agency examines and issues the electronic Certificate of Origin with a QR code within one working day; the importer and the partner customs verify it online. Manual certificates are no longer valid.	Registration; digital signature or Aadhaar e-sign; invoice (the invoice number must match the shipping bill), packing list, shipping bill or bill of lading for post-shipment certificates, manufacturer's declaration and cost sheet where the agency asks; the agency's fee (Appendix 2K).
European Union (after entry into force, expected 2027)	Statement on origin by a registered exporter on the invoice or another commercial document; the Indian registration and the procedure on Trade Connect are to be notified by DGFT.	Nothing yet. Watch for the DGFT notice; no preference exists until the agreement is in force.

EXHIBIT 11

Which proof of origin, by agreement

All proofs are issued on the Trade Connect ePlatform (trade.gov.in)

Source: DGFT trade notices; this Handbook, Part C, Step 4

The application on Trade Connect, step by step

Step 1 Register at trade.gov.in with the email and mobile number used for the IEC; existing DGFT website credentials work. Link the IEC on the dashboard; the firm's name will appear.

Step 2 Under "My Dashboard", register the digital signature token or Aadhaar e-sign of the authorised signatory. For UK self-declaration the digital signature is compulsory and the name on it must match the DGFT profile exactly.

Step 3 Open "Get Certificate of Origin" and click "Apply for Certificate of Origin". Choose the agreement (and, for the UK, self-declaration or agency), the issuing agency and the office.

Step 4 Fill the eight screens: basic details (IEC, branch, GSTIN), certificate details, export details (invoice, consignee), import details (importer, port), shipment details (vessel, route), attachments (invoice, packing list, shipping bill or bill of lading, cost sheet or manufacturer's declaration where asked), declaration, and the summary. Submit with the digital signature or e-sign.

Step 5 Track the application under "Submitted Applications". An agency certificate shows "Approved" when issued; a self-declaration shows "Auto Approved Pending Issuance", after which you generate the certificate. Download the electronic copy (with QR code and digital signature) and, where the importer needs it, the physical copy for ink signature.

Step 6 Send the certificate or declaration to the importer with the invoice. Anyone can verify it with the certificate number under "Verify Certificate".

Help: Certificate of Origin helpdesk, DGFT: coo-dgft@gov.in, 011-23061495 and 011-23061499 (Monday to Friday); the Madhya Pradesh FTA Helpdesk; the DGFT Regional Authority, Bhopal. Certificates can be applied for after shipment where the agreement allows (marked "issued retrospectively"); apply before shipment wherever possible.

Step 5. Ship, let the importer claim, keep the records

- Tell the importer in advance that the consignment qualifies, and send the proof of origin with the shipping documents; the importer's customs broker claims the preferential duty on the import entry.
- If the proof was not available at import, the agreements require the importing customs to allow a later claim for at least one year after import; check the partner's procedure and deadline.
- A certificate is valid for twelve months from issue under every recent agreement (180 days under the MERCOSUR agreement). One certificate covers one consignment, except that under the UK and New Zealand agreements one proof may cover repeated shipments of identical goods for a stated period of up to twelve months. A certificate can be issued within five working days of shipment or, if missed, retrospectively within twelve months.
- The importing customs may ask for the origin to be verified. You will be asked for the cost sheet, supplier declarations and production records, within the time the request gives: at least 30 days under the Australia agreement and 60 days under the New Zealand agreement; under the UK, UAE and Oman agreements the request reaches you through the Indian authority (DGFT or the issuing agency), which itself has fixed periods to answer the partner (15 to 90 days under the Oman agreement), so reply within days. Annex 2 lists the documents. An unanswered request means the importer pays the full duty and may charge it back to you.
- Keep every record for five years from the date of export.

Is the claim worth making on this consignment?

The duty saved is the FOB value multiplied by the difference between the MFN duty and the preferential duty. The cost of claiming is the agency fee (self-declarations are free), the time of the person who prepares the application, and the one-time cost of the digital signature and the cost sheet. For most consignments from the State the saving is many times the cost.

Consignment	Duty without the agreement	Duty saved	Cost of claiming
Namkeen, USD 20,000 FOB, to the UK (duty 3% to 0%)	USD 600	USD 600 (about ₹ 57,000)	Self-declaration: nil fee; one hour of work
Brake assemblies, USD 60,000 FOB, to the UAE (5% to 0%)	USD 3,000	USD 3,000 (about ₹ 2.85 lakh)	Agency certificate: fee of a few hundred rupees; one to two days
Cotton T-shirts, USD 15,000 FOB, to Australia (5% to 0%)	USD 750	USD 750 (about ₹ 71,000)	Agency certificate; fabric-origin records
Formulations, USD 100,000 FOB, to Australia (0% MFN)	Nil	Nil	No certificate needed; spend the effort on TGA registration
Herbal extract sample, USD 400, to Switzerland (duty 2% to 0%)	USD 8	USD 8	Not worth it unless the declaration is already routine

Exchange rate ₹ 95 to the US dollar for illustration (the European Central Bank reference rates of 30 October 2026, EUR 1 = INR 106.08 and EUR 1 = USD 1.1172, give ₹ 94.95). Agency fees are those in Appendix 2K of the Handbook of Procedures; self-declared certificates under the UK and EFTA agreements are free.

Three worked examples

1. Namkeen from Indore to London (HS 210690, UK agreement)

A Ratlam-style namkeen made from Indian gram flour, groundnut oil, Indian spices and salt, packed for retail. All inputs are Indian: the product is made entirely from originating materials and qualifies without a value calculation. The UK's MFN duty on the line was 3% and is zero under the agreement. The exporter registers on Trade Connect, links the IEC and the digital signature, applies under "India UK CETA (Self-Declaration)", generates the certificate and sends it to the importer with the invoice. The importer claims zero duty. Separately, the importer must be registered as a food business and the label must meet UK food labelling rules (allergens, nutrition, English language); the exporter supplies the specification and the test report for the batch.

2. Brake assemblies from Pithampur to Dubai (HS 870830, UAE agreement)

The assembly uses imported sensors and alloy worth 30% of the FOB value; the rest is Indian castings, machining, labour and overheads. The product-specific rule (Annex 3B, chapter 87) asks for a change in tariff heading and value addition of 45% of FOB; both are met (see the example in Step 3). The UAE's duty is 5% and falls to zero. The exporter applies on Trade Connect to the Export Inspection Agency (or the DGFT Regional Authority, Bhopal, where notified) with the invoice, packing list and cost sheet; the agency issues the electronic Certificate of Origin; the importer in Dubai claims the preference against it. The exporter keeps the cost sheet and supplier declarations for five years. The buyer will separately ask for the IATF 16949 certificate and the material test reports.

3. Formulations from Pithampur to Sydney (HS 300490, Australia agreement)

Australia's MFN duty on medicines is already zero. The agreement changes nothing on duty for this line, and no certificate of origin is needed. The work is in registration: the product must be on the Australian Register of Therapeutic Goods through an Australian sponsor, with GMP clearance for the Pithampur site. The agreement's provisions on recognition of inspections and approvals can shorten that process; Pharmexcil and the Helpdesk can explain the current position. The exporter's effort goes there, and the table in Part B marks the line "supply side".

The ten most common mistakes

1. Using the wrong HS code, so the wrong duty and the wrong rule are applied.
2. Applying for a certificate for a line whose MFN duty is already zero.
3. Choosing the wrong agreement on the application (the UAE certificate is not valid in Oman).
4. A digital signature in a name that does not match the DGFT profile, or not linked to the IEC.
5. Treating a product made from imported fabric or imported technical-grade chemicals as Indian without checking the product-specific rule.
6. No cost sheet or supplier declarations when the agency or the partner customs asks.
7. Shipping through a third country without keeping the goods under customs control, or without the through bill of lading.
8. An invoice number on the certificate that differs from the shipping bill, or invoice details (value, currency, quantity, consignee) that differ from the invoice presented at import; the partner's customs now verifies certificates electronically.
9. Sending the certificate to the importer after the goods have been cleared at full duty, and then missing the refund deadline.
10. Discarding the records before five years have passed.

Part D. Support for exporters

What a Madhya Pradesh exporter can draw on, in four groups: the Government of India's Export Promotion Mission, the State's Export Policy 2025, the five things launched on 5 November 2026, and the institutions in the State.

D1. Export Promotion Mission (Government of India, 2025-26 to 2030-31)

Outlay ₹ 25,060 crore over six years. Two arms: **Niryat Protsahan** (finance) and **Niryat Disha** (market access, certification, logistics, intelligence). Applications are made on dgft.gov.in (finance) and trade.gov.in (the rest). The figures below are from the trade notices in force in October 2026; the DGFT Regional Authority, Bhopal and the Helpdesk have the current notices.

Scheme	What it gives	Who can apply and how
Interest subvention (Niryat Protsahan)	2.75% a year on pre- and post-shipment rupee export credit, up to ₹ 50 lakh per IEC a year, for notified product lines.	MSME exporters with IEC and Udyam registration; generate the unique identification number on dgft.gov.in within 15 days of the disbursal; the bank claims monthly. EXIM Bank implements the scheme from 1 April 2026.
Collateral support (Niryat Protsahan)	Credit guarantee of 85% for micro and small and 65% for medium enterprises on export working capital, up to ₹ 10 crore per exporter a year.	MSME exporters through CGTMSE; file the intent to claim on dgft.gov.in.
Export factoring (Niryat Protsahan)	2.75% subvention on the cost of factoring, up to ₹ 50 lakh per IEC a year.	MSME exporters using registered factoring entities; claims through the factor against the IEC. May be used alongside the interest subvention, not on the same invoice.
E-commerce credit (Niryat Protsahan)	Guarantee of 90% on direct e-commerce export credit up to ₹ 50 lakh and 75% on overseas-inventory credit up to ₹ 5 crore, with 2.75% subvention up to ₹ 15 lakh a year.	MSME e-commerce exporters with IEC and Udyam registration, through EXIM Bank.
Emerging export opportunities (Niryat Protsahan)	Support of 10 to 80% of the transaction value, set by risk score, on letters of credit and similar instruments (confirmation, negotiation, standby letters of credit, risk participation up to 90%) for exports to 72 listed under-served markets.	Through EXIM Bank's trade assistance programme.
TRACE: certification and testing (Niryat Disha)	Reimbursement of the cost of international certification and testing on the eligible list of 462 items (CE, UKCA, FDA, ISO, BRCGS, FSSC 22000, HACCP, Halal, SMETA and others): micro and small enterprises up to 95% and medium enterprises up to 80% of the cost net of taxes, up to ₹ 50 lakh per IEC a year, paid in two instalments (after certification and after exports are shown; the export evidence is due within two years).	Exporters with IEC and Udyam; file the intent to claim on trade.gov.in before the certification starts; claim after export.
LIFT: inland freight (Niryat Disha)	30% of the cost of transport from the factory to the ICD, port or air cargo complex, up to ₹ 20 lakh per IEC a year, for notified products from notified districts.	At present limited to the north-eastern and hill States and Bihar; Madhya Pradesh has asked for inclusion (Action Plan, request 2).

Scheme	What it gives	Who can apply and how
Market Access Support (Niryat Disha)	Support for trade fairs, buyer-seller meets, reverse buyer-seller meets and delegations organised by Councils, boards, associations and State agencies; airfare support for MSME participants.	Exporters participate through their Council or MPIDC; the organiser applies on trade.gov.in.
FLOW: overseas warehousing (Niryat Disha)	30% of the lease, rental and operating cost of overseas warehousing, fulfilment, display centres and e-commerce export hubs, for up to three years; up to ₹ 10 crore a year for an export hub, ₹ 5 crore a year for display or market-access facilities and ₹ 5 lakh a month for overseas fulfilment.	Councils, boards, logistics providers, associations and State agencies; not individual exporters.
INSIGHT: trade intelligence (Niryat Disha)	Up to 50% of the approved project cost of trade-intelligence tools (₹ 15 lakh), training (₹ 25 lakh), research and pilots (₹ 25 lakh) and district or cluster facilitation (₹ 50 lakh); up to 100% for government departments and institutions, district and State export promotion committees.	Institutions; MPIDC will use it for the FTA module and the district sessions.
Branding and packaging (Niryat Disha)	Up to 50% (₹ 10 crore) for sector branding campaigns; Brand India campaigns by Councils and boards.	Councils, boards, associations and State agencies.

EXHIBIT 12

Export Promotion Mission: two arms, eleven schemes, the cap of each

Figures from the trade notices in force in October 2026; the full conditions are in table D1

Export Promotion Mission · ₹ 25,060 crore · 2025-26 to 2030-31

Niryat Protsahan (finance): apply on dgft.gov.in

Interest subvention
2.75% a year on rupee export credit; up to ₹ 50 lakh per IEC a year

Collateral support
Credit guarantee of 85% (micro and small) or 65% (medium); up to ₹ 10 crore a year

Export factoring
2.75% subvention on the cost of factoring; up to ₹ 50 lakh per IEC a year

E-commerce credit
Guarantee of 90% up to ₹ 50 lakh, 75% on overseas inventory up to ₹ 5 crore; subvention up to ₹ 15 lakh a year

Emerging export opportunities
Support of 10 to 80% of the transaction value on letters of credit; 72 listed markets

Niryat Disha (market access, certification, logistics, intelligence): apply on trade.gov.in

TRACE: certification and testing
Up to 95% (micro and small) or 80% (medium) of the cost; up to ₹ 50 lakh per IEC a year

Up to 50% (₹ 10 crore) for sector branding campaigns

Source: DGFT trade notices; this Handbook, table D1

D2. Madhya Pradesh Export Policy 2025

Assistance under the Madhya Pradesh Export Promotion Policy 2025 (notified 24 February 2025) and the Export Promotion Scheme 2025 made under it, for manufacturing units in the State that export at least 25% of their production; eligibility is applied for on the Invest MP portal within 180 days of commercial production and claims are made there each year, sanctioned by the Managing Director, MPIDC. The figures below are from the Scheme; the current guidelines and claim forms are on the MP Trade Portal.

Assistance	What it gives
First-time exporter	Reimbursement of the cost of the Registration-cum-Membership Certificate with a Council, up to ₹ 10 lakh, and of export insurance premiums in the first twelve months after commercial production, up to ₹ 25 lakh (Scheme clause 6.1).
Export freight	Up to 50% of the cost of transport from the factory to the seaport, the air cargo complex or the land border, for five years, up to ₹ 40 lakh per unit in a year and ₹ 2 crore in all.
Export infrastructure	One-time 25% of the investment, up to ₹ 1 crore, in testing laboratories, R&D centres, quality-control and certification facilities, and export incubation centres.
Export turnover	10% of the annual increase in FOB value of exports from the second year of exporting, for up to five years, up to ₹ 2 crore per unit in all for the policy period (Scheme clause 6.5).
Export marketing	75% of the cost of taking part in trade fairs, exhibitions and buyer-seller meets in India and abroad, up to ₹ 5 lakh a year for five years, once a year.
Green documentation and certification	50% of the cost of export documentation and certification, including quality testing, green and energy certifications and compliance with EU ETS, CBAM and similar requirements, up to ₹ 20 lakh a year for five years.
Export credit	Interest subsidy of up to 5% on pre-shipment and post-shipment rupee export credit, up to ₹ 50 lakh per unit over five years; claimed each year with the bank certificate of the credit sanctioned and disbursed (Scheme clause 6.8).
Growth sectors	An additional 5% of the annual increase in FOB value, up to ₹ 30 lakh a year for five years, for footwear, gems and jewellery, toys, optical and medical instruments, plastics and rubber, furniture, EV transport equipment, battery components, electronics, drones, white goods and capital goods.

D3. Launched on 5 November 2026

Service	What it is and how to use it
Madhya Pradesh FTA Helpdesk	One telephone number and one email at the MPIDC Export Cell, Bhopal, on working days from 10 AM to 6 PM. Any question on the agreements, the rules, the certificate, the schemes or the contacts. Answer within two working days; technical questions referred to DGFT, Customs or the agencies within five. **Telephone: 0755 2577145** **Email:** export.investment@mpidc.co.in
FTA module of the MP Trade Portal	For each of the State's product lines: the duty under each agreement, the rule of origin, the proof-of-origin route, the agencies, the schemes, and the Helpdesk and Accelerator forms. Linked to the Trade Connect Tariff Explorer. Updated as notices change.

Service	What it is and how to use it
Madhya Pradesh FTA Accelerator	Twelve weeks that take a firm from a product to its first shipment under an agreement, 1 December 2026 to 28 February 2027. Cohort 1: 80 firms, 20 in each of four sectors (engineering and auto components, pharmaceuticals, agriculture and food, textiles and apparel); chemicals joins cohort 2. Four phases, each with two sessions and a one-to-one call with the Export Cell officer: the agreement for your product; the rule of origin and its proof; the market, standards, cost and finance; the buyer. Pitch day at Indore on 28 January; buyer meetings through the Indian Missions and bilateral chambers; ninety days of follow-up until the first certificate is filed. Enrolment closes 30 November 2026. Faculty from DGFT, Customs, the certificate-issuing agencies, the Councils, ECGC and EXIM Bank. No fee for cohort 1. Eligibility: a valid IEC, a product that gains duty under an agreement, a target market, and one named person who will attend every session. Apply on the Portal or at the Helpdesk; enrolment closes 30 November 2026.
Madhya Pradesh FTA Action Plan 2026-27	The State's own commitments: seven objectives and thirty-five actions with owners and dates, reviewed every quarter by the Additional Chief Secretary; with Sector Intervention Matrices for four sectors. Available on the Portal.
This Handbook	English and Hindi editions in print and on the Portal; revised when the EU agreement enters into force.

EXHIBIT 13

The FTA Accelerator: twelve weeks from 1 December 2026, then ninety days of follow-up

Cohort 1: 80 firms, 20 in each of four sectors; no fee; enrolment closes 30 November 2026

Damoh	Dried shelled beans	No duty cut on these lines under the agreements; see the low-priority list in B3.
Dewas	Soya beans, Soybean oilcake / meal, Soybean & fixed veg oils, Soy protein concentrates, Poha / flaked rice prep., Cotton yarn, combed, Combed yarn, fine count, Denim fabric, Men's cotton trousers, Automotive components, Body parts & accessories, Brakes & servo-brakes, Gear boxes & parts, Drive-axles with differential, Road wheels & parts, Suspension & shock absorbers, Steering wheels & columns, Centrifugal pumps, Vehicle wiring sets, Insecticides, Fungicides, Herbicides & regulators, Chemical preparations, n.e.s., Vitamin medicaments, Organic compounds, n.e.s., Pyrazole heterocyclics, Pyridine heterocyclics, Pyrimidine compounds, Vitamins & derivatives	United Kingdom, EFTA, Australia, European Union, New Zealand, Oman, UAE
Dhar	Soya beans, Plain woven cotton, dyed, Printed woven cotton (Bagh), Printed cotton, heavier, Printed cotton bedlinen, Cotton interior furnishings	EFTA, United Kingdom, Australia, European Union
Guna	Coriander seeds, whole, Coriander, crushed / ground	No duty cut on these lines under the agreements; see the low-priority list in B3.
Gwalior	Potatoes, fresh (excl. seed), Skimmed milk powder, Ghee & milk fats	United Kingdom, EFTA, European Union
Hoshangabad	Natural honey	United Kingdom, European Union

District	Export products identified	Markets where the duty falls
Indore	Soya beans, Soybean oilcake / meal, Soybean & fixed veg oils, Soy protein concentrates, Potatoes, fresh (excl. seed), Poha / flaked rice prep., Puffed & roasted cereal foods, Sweet biscuits, Sauces & mixed condiments, Namkeen & food preparations, Preserved vegetable prep., Skimmed milk powder, Ghee & milk fats, Cotton yarn, uncombed, Cotton yarn, fine count, Cotton yarn, combed, Combed yarn, fine count, Combed yarn, finer count, Woven cotton, unbleached, Plain woven cotton, dyed, Denim fabric, Denim, blended, Textured polyester yarn, Cabled polyester yarn, Textured polyester, dyed, Textured polyester, printed, Polyester-blend yarn, Polyester-viscose fabric, Cotton T-shirts & vests, Cotton pullovers & cardigans, Knitted cotton dresses, Men's cotton trousers, Women's cotton dresses, Men's cotton shirts, Women's cotton blouses, Printed cotton bedlinen, Cotton bedlinen, unprinted, Toilet & kitchen linen, Cotton interior furnishings, Made-up textile articles, Centrifugal pumps, Parts of liquid pumps, Taps, cocks & valves, Parts of valves, Titanium dioxide pigments, Other colouring pigments, Printing ink, Other inks, Extracted oleoresins, Enzymes and prepared enzymes, Insulin medicaments, Immunological products, Antisera & blood fractions, Immunological products, mixed, Wadding, gauze & dressings	United Kingdom, New Zealand, Oman, EFTA, Australia, European Union, UAE
Itarsi	Soybean & fixed veg oils	United Kingdom, EFTA, European Union
Jabalpur	Linseed	No duty cut on these lines under the agreements; see the low-priority list in B3.
Katni	Linseed, Refractory cements & mortars, Activated carbon	UAE
Khandwa	Onion, fresh or chilled, Bananas	United Kingdom, EFTA, European Union
Khargone	Woven cotton, unbleached, Plain woven cotton, heavier, Shawls, scarves & stoles, Bedspreads	European Union
Malanpur	Motorcycle parts, Taps, cocks & valves, Articles of iron or steel, Forged iron / steel articles, Cast iron / steel articles, Iron / steel structures, Towers & lattice masts, Iron / steel screws & bolts, Threaded articles, n.e.s., Aluminium plates & sheets, Aluminium doors & windows, Articles of aluminium, n.e.s., AC motors, 0.75-75 kW, Insulated conductors, fitted, Medicaments, retail packs, Hormone-based medicaments, Medicaments, bulk	United Kingdom, New Zealand, Oman, Australia, European Union, UAE
Mandideep	Automotive components, Silencers & exhaust pipes, Goods vehicles, diesel, light, Centrifugal pumps, Parts of liquid pumps, Taps, cocks & valves, Parts of valves, Articles of iron or steel, Forged iron / steel articles, Cast iron / steel articles, Iron / steel structures, Towers & lattice masts, Aluminium plates & sheets, Aluminium doors & windows, Articles of aluminium, n.e.s., AC motors, 0.75-75 kW, Insulated conductors, fitted, Insecticides, Fungicides, Herbicides & regulators, Plant protection products, Insecticide formulations, Sodium bicarbonate, Titanium dioxide pigments, Other colouring pigments, Printing ink, Other inks, Surfactants & detergents, Polymer-based adhesives, Chemical preparations, n.e.s., Refractory cements & mortars, Extracted oleoresins, Organo-sulphur compounds, Enzymes and prepared enzymes, Activated carbon	United Kingdom, New Zealand, Oman, Australia, European Union, UAE, EFTA

District	Export products identified	Markets where the duty falls
Mandla	Natural gums, resins & lac, Medicinal plants & seeds, Medicinal plants & herbs, Vegetable saps & extracts	Australia, UAE
Mandsaur	Coriander seeds, whole, Coriander, crushed / ground, Garlic, fresh or chilled	United Kingdom, European Union
Morena	Mustard seeds, Mustard / rapeseed oilcake	No duty cut on these lines under the agreements; see the low-priority list in B3.
Nagda	Textured polyester yarn, Cabled polyester yarn, Textured polyester, dyed, Polyester-blend yarn, Polyester-viscose fabric, Caustic soda, solid, Caustic soda lye, Disodium carbonate (soda ash), Sodium bicarbonate	Oman, European Union, UAE
Narsinghpur	Maize (excl. seed), Dried shelled beans	EFTA
Neemuch	Coriander seeds, whole, Coriander, crushed / ground, Garlic, fresh or chilled	United Kingdom, European Union
Niwari	Ginger, whole	No duty cut on these lines under the agreements; see the low-priority list in B3.
Pithampur	Sweet biscuits, Cotton yarn, uncombed, Cotton yarn, fine count, Combed yarn, finer count, Plain woven cotton, dyed, Denim fabric, Denim, blended, Cotton T-shirts & vests, Cotton pullovers & cardigans, Men's cotton trousers, Men's cotton shirts, Automotive components, Body parts & accessories, Brakes & servo-brakes, Gear boxes & parts, Drive-axles with differential, Road wheels & parts, Suspension & shock absorbers, Silencers & exhaust pipes, Steering wheels & columns, Motorcycle parts, Goods vehicles, diesel, light, Bodies for motor cars, Articles of iron or steel, Iron / steel screws & bolts, Threaded articles, n.e.s., Vehicle wiring sets, Insecticides, Plant protection products, Surfactants & detergents, Polymer-based adhesives, Chemical preparations, n.e.s., Medicaments, retail packs, Antibiotic medicaments, Penicillin medicaments, Insulin medicaments, Corticosteroid medicaments, Hormone-based medicaments, Vitamin medicaments, Medicaments, bulk, Immunological products, Immunological products, mixed, Wadding, gauze & dressings, Penicillins & derivatives, Other antibiotics, Vitamins & derivatives, Steroidal hormones	New Zealand, Oman, EFTA, UAE, United Kingdom, Australia, European Union
Raisen	Paddy / rice in husk, Semi/wholly milled rice	EFTA, European Union
Rajgarh	Coriander seeds, whole, Oranges, fresh or dried	United Kingdom, EFTA, European Union
Ratlam	Garlic, fresh or chilled, Sauces & mixed condiments, Namkeen & food preparations, Preserved vegetable prep., Organo-sulphur compounds, Medicaments, retail packs, Antibiotic medicaments, Penicillin medicaments, Corticosteroid medicaments, Medicaments, bulk, Penicillins & derivatives, Erythromycin & derivatives, Other antibiotics, Organic compounds, n.e.s., Pyrazole heterocyclics, Pyridine heterocyclics, Pyrimidine compounds, Steroidal hormones	United Kingdom, New Zealand, Oman, EFTA, Australia, European Union, UAE
Rewa	Tufted wool carpets	European Union
Sagar	Dried shelled beans, Linseed	No duty cut on these lines under the agreements; see the low-priority list in B3.

District	Export products identified	Markets where the duty falls
Satna	Tomatoes, fresh or chilled	United Kingdom, EFTA, European Union
Sehore	Soya beans, Tomatoes, fresh or chilled, Wheat / meslin flour	United Kingdom, EFTA, European Union
Shajapur	Onion, fresh or chilled	United Kingdom, European Union
Sheopur	Mustard seeds	No duty cut on these lines under the agreements; see the low-priority list in B3.
Sidhi	Hand-knotted wool carpets, Tufted wool carpets, Other textile floor coverings	United Kingdom, European Union
Tikamgarh	Ginger, whole	No duty cut on these lines under the agreements; see the low-priority list in B3.
Ujjain	Soya beans, Soybean oilcake / meal, Onion, fresh or chilled, Potatoes, fresh (excl. seed), Wheat / meslin flour, Poha / flaked rice prep., Puffed & roasted cereal foods, Namkeen & food preparations, Cotton yarn, uncombed, Cotton yarn, combed, Printed woven cotton (Bagh), Printed cotton, heavier, Textured polyester, printed, Knitted cotton dresses, Women's cotton dresses, Women's cotton blouses, Printed cotton bedlinen	United Kingdom, New Zealand, Oman, EFTA, Australia, European Union, UAE
Umaria	Natural gums, resins & lac	No duty cut on these lines under the agreements; see the low-priority list in B3.
Vidisha	Semi/wholly milled rice, Broken rice, Wheat / meslin flour	United Kingdom, EFTA, European Union

Annex 1. Rules of origin for Madhya Pradesh's main lines, agreement by agreement

The rules below are taken from the product-specific rules of each agreement as published in October 2026: UK Annex 3A, UAE Annex 3B, Australia Chapter 4 and Annex 4B, EFTA Appendix 2.A.1 to Annex 2.A, Oman Annex 3B and New Zealand Annex 3A. Each cell gives the rule for the six-digit line, or the heading or chapter rule that covers it. The EU rules (Annex 3-B, published by the Commission in February 2026) are not included; check them before shipping once the agreement is in force. The annex of the agreement governs: confirm the rule for your exact line on Trade Connect before shipping.

How to read the table. CC, CTH, CTSH: every non-originating input must fall under a different chapter, heading or sub-heading from the product. WO: wholly obtained in India. "or" means either test is enough; "and" or "+" means both are needed. UK "Standard QVC": value content of 40% of the ex-works price (45% of FOB) by build-down, or 35% by build-up; "QVC 50/55/45" means 50% ex-works or 55% FOB by build-down, or 45% by build-up. UAE "VA 40%": value addition of 40% of FOB (35% of ex-works). Oman "VA 40%": 40% by build-down (35% by build-up). Australia "General rule": the line is not in Annex 4B, so Article 4.3 applies: a change in sub-heading plus 35% of FOB by build-up or 45% by build-down, with the final production process in India. EFTA "VNM 50%": non-originating materials not above 50% of the ex-works price (45% of FOB). New Zealand "QVC 45%": 45% of FOB by build-down (35% by build-up).

HS lines	Product	United Kingdom (Annex 3A)	UAE (Annex 3B)	Australia (Chapter 4, Annex 4B)	EFTA (Appendix 2.A.1)	Oman (Annex 3B)	New Zealand (Annex 3A)

HS lines	Product	United Kingdom (Annex 3A)	UAE (Annex 3B)	Australia (Chapter 4, Annex 4B)	EFTA (Appendix 2.A.1)	Oman (Annex 3B)	New Zealand (Annex 3A)
281511, 281512, 283620, 283630	Caustic soda, soda ash, sodium bicarbonate (chapter 28)	CTSH; or Standard QVC; or chemical reaction	CTSH + VA 40%	General rule	2815: CTSH; or VNM 60%. 2836: CTSH and VNM 60%	CTSH + VA 40%	CTSH + QVC 45%
350790	Enzymes (3507)	CTSH; or chemical reaction	CTSH + VA 40%	General rule	CTSH; or VNM 60%	CTSH + VA 40%	CTSH + QVC 45%

Tolerances: UK 12.5% of value (7.5% for chapters 1 to 3, 5, 6, 10 and 14); UAE 10% of value, textiles 7% by weight or 10% by value; Australia 10% of FOB, textiles 10% by weight; EFTA 10% of value; Oman 10%; New Zealand 10% of FOB, textiles 10% by weight or value. A tolerance relaxes the change-in-classification test only, never a value test.

Annex 2. Cost sheet, supplier declaration and the documents a verification asks for

Every claim rests on a cost sheet for the product and on evidence of the origin of its inputs. Prepare both before the first certificate and revise them when a supplier, a price or the product changes. The formats below are working templates; where an issuing agency prescribes its own form, use that.

A. Cost sheet for one unit of the product

Cost item	Evidence	HS code of input	Origin	Value (₹ per unit)	Share of FOB (%)
Indian materials (list each: castings, fabric, flour, API, packing for retail sale)	Supplier invoice; supplier declaration (Part B below)	…	India	…	…
Partner-country materials (count as originating through cumulation)	Supplier invoice; the partner proof of origin	…	Partner	…	…
Imported materials from any other country (list each)	Bill of entry; CIF value at the Indian port	…	Non-originating	…	…
Materials of unknown origin (treat as non-originating)	Invoice	…	Non-originating	…	…
Direct labour	Wage records		India	…	…
Factory overheads (power, depreciation, consumables, tooling)	Accounts		India	…	…
Profit and inland freight to the port (FOB only)	Accounts; freight invoice		India	…	…
Total: ex-works price / FOB value				…	100%
Value content: build-down = (FOB − non-originating materials) ÷ FOB; build-up = (originating materials + direct processing cost) ÷ FOB	Compare with the threshold in Annex 1				… %

Value imported materials at CIF at the Indian port (Australia, UAE, Oman and New Zealand agreements) or at their customs value (UK and EFTA); value Indian materials at the price paid. Packing for retail sale counts with the product; export packing and freight after the factory gate do not. Keep one sheet per product and per method, dated, and keep it with the production records for five years.

B. Supplier's declaration of origin for Indian inputs (template)

We, [name, address and GSTIN of the supplier], declare that the goods described below, supplied to [name of the exporter] under invoice [number and date], are [wholly obtained in India] / [produced in India and meet the rule of origin for HS [code] under the India–[partner] agreement, with non-originating materials of [value and share]]. We will keep the records that support this declaration for five years and make them available to the exporter, the issuing agency or Customs on request. Description of goods: … HS code: … Quantity: … Signature, name and designation: … Date: …

Take a declaration for each Indian input that matters to the rule; a general letter "all our goods are Indian" carries little weight in a verification. For Indian steel, ask the mill for the certificate showing where the steel was melted and poured.

C. What a verification request asks for

1. **The proof of origin and the export documents:** the certificate or declaration, invoice, packing list, shipping bill and bill of lading or airway bill.
2. **The cost sheet** for the product as it stood on the date of export, with the method and the threshold used.
3. **Imported inputs:** bills of entry and supplier invoices showing the CIF value and HS code of each non-originating material.
4. **Indian inputs:** supplier invoices and supplier declarations; mill certificates for steel.
5. **Production records:** batch or job cards, bills of material and process sheets that show the operation done in India (the chemical reaction, the cutting and sewing, the machining and assembly).
6. **Transport evidence:** the through bill of lading and, where the goods passed through a third country, proof that they stayed under customs control.
7. **Accounts:** the ledger entries behind labour, overheads and profit, kept under Indian accounting standards, and the inventory records where originating and non-originating inputs are mixed in stock.
8. **Timing:** answer within the time the request gives (at least 30 days under the Australia agreement, 60 under the New Zealand agreement; under the UK, UAE and Oman agreements the Indian authority answers the partner within fixed periods and will need your papers within days). Copy the issuing agency and the Helpdesk.

Annex 3. The origin declaration: what the exporter signs

Under the UK and EFTA agreements the Indian exporter files the self-declared electronic Certificate of Origin on Trade Connect, which carries the statement below in the format DGFT prescribes. The texts are reproduced from the agreements so that the signatory knows what is being certified. Under the UAE, Australia and Oman agreements there is no self-declaration by Indian exporters: the agency certificate carries the minimum information of Annex 3A (UAE), Annex 4A (Australia) and Annex 3A (Oman), and the exporter signs the application and the manufacturer's declaration on Trade Connect.

United Kingdom: Annex 3B of the agreement (Origin Declaration template)

Eleven boxes: (1) signatory, exporter or producer, with name, title, e-mail and telephone; (2) exporter details; (3) producer details if different; (4) importer details if known; (5) the signatory's reference number, which for an Indian signatory is the IEC; (6) HS code at six digits, description of the goods, invoice number and date; (7) origin criterion: WO (wholly obtained), PE (produced exclusively from originating materials) or PSR (meets the product-specific rule, which is to be identified), with a box for a non-party invoice; (8) non-alteration, where the goods pass through or are stored in a non-party; (9) roll-up of materials used in production; (10) single shipment, or multiple shipments of identical goods within a stated period of up to 12 months; (11) the declaration, signature and date, with a box for a declaration completed retrospectively.

Box 11, the declaration: "The exporter/producer certifies that the good(s) described in this document qualify as originating and the information contained in this document is true and accurate. The exporter/producer is responsible for proving such representations, which may include, where appropriate, written representation(s) from the supplier(s). In accordance with Articles 3.24 (Record Keeping Requirements) and 3.25 (Verification of Origin), the exporter/producer agrees to maintain and present upon request, or make available during a verification visit, information, which may include documentation, relating to the origin of the goods and where applicable, materials."

EFTA: Appendix 2.A.2 to Annex 2.A (text of the origin declaration)

Wording: "The exporter of the products covered by this document (authorisation No …) declares that, except where otherwise clearly indicated, these products are of … preferential origin." Place and date, signature and name of the signatory. For Indian exporters the proof is the self-declared or agency-issued Certificate of Origin in the format of Appendix 2.A.3, generated on Trade Connect; the authorisation-number form is used by approved exporters in the EFTA States.

New Zealand: Annex 3C of the agreement (Origin Declaration template, for approved exporters and Status Holders)

Twelve boxes: (1) exporter's name, address and country, and the unique identification number; (2) importer or consignee; (3) transport details; (4) third-party invoice; (5) remarks, for example "ISSUED RETROSPECTIVELY" or "CERTIFIED TRUE COPY"; (6) single shipment or multiple shipments of identical goods (Indian Status Holders only); (7) item number; (8) HS code at six digits, description, marks and numbers, packages; (9) origin criteria: WO, CTC, QVC, process rule, de minimis, cumulation; (10) gross weight or other measure; (11) invoice numbers and dates; (12) the declaration, place and date, signature, name, company and the Status Holder certificate number.

Box 12, the declaration: "I, the undersigned, declare that the above details and statement are true and accurate, the good(s) described above meet the condition(s) required for the issuance of this certificate, and the country of origin of the good(s) described above is: …"

Annex 4. HS code index

Every six-digit line in Part B, with the markets where its duty falls under an agreement and the markets where it was already duty-free, from the tables in this Handbook. “see B3” marks the EFTA lines where the cut is seasonal, within a quota or a reduction rather than nil; “no cut” marks the lines the EU or the EFTA schedules leave dutiable.

HS	Product	Chapter	Duty falls under the agreement	Already duty-free
040210	Skimmed milk powder	B3	European Union (no cut)	none
040590	Ghee & milk fats	B3	European Union (see B3)	none
040900	Natural honey	B3	United Kingdom, European Union (no cut)	none
070190	Potatoes, fresh (excl. seed)	B3	United Kingdom, European Union, Norway (no cut), Switzerland (see B3), Iceland (see B3)	UAE
070200	Tomatoes, fresh or chilled	B3	United Kingdom, European Union, Norway (see B3), Switzerland (see B3), Iceland	none
070310	Onion, fresh or chilled	B3	United Kingdom, European Union	none
070320	Garlic, fresh or chilled	B3	United Kingdom, European Union (no cut)	none
080390	Bananas	B3	United Kingdom, European Union (no cut), Switzerland (no cut)	New Zealand, Norway, Iceland
080510	Oranges, fresh or dried	B3	United Kingdom, European Union, Norway, Switzerland	none
100590	Maize (excl. seed)	B3	Norway, Switzerland (see B3), Iceland	United Kingdom, European Union, UAE, Oman
100610	Paddy / rice in husk	B3	European Union (no cut)	none
100630	Semi/wholly milled rice	B3	European Union (no cut), Norway, Switzerland	New Zealand

Glossary

Term	Meaning
Trade agreement (FTA, CEPA, CETA, ECTA, TEPA)	An agreement between India and a partner under which each side reduces or removes duties on the other's goods. The names differ; the effect for an exporter is the same.
MFN duty	The normal duty a country charges on imports from all WTO members. The agreement gives a lower, preferential duty.
HS code, ITC-HS	The Harmonised System code of the product; six digits are common to all countries; India's eight-digit version is the ITC-HS code on the shipping bill.
Rule of origin, product-specific rule	The condition a product must meet to count as Indian under the agreement; the product-specific rule is the one written for the product's HS line in the agreement's annex.
CTC, CC, CTH, CTSH	Change in tariff classification: the imported inputs must fall under a different chapter (CC), heading (CTH, four digits) or sub-heading (CTSH, six digits) from the finished product.
QVC, RVC, value content	The share of the product's value added in India (or in India and the partner), by the build-up or build-down method on the FOB or ex-works price.
De minimis	A tolerance (commonly 10%) that lets a small share of inputs ignore the change-in-classification rule.
Cumulation	Inputs from the partner count as originating when used in India, and the other way round.
Certificate of Origin (CoO, eCoO)	The document that proves origin; issued electronically on Trade Connect by a notified agency.
Self-certification, origin declaration, self-declaration	The exporter's own signed statement of origin. In India it is filed as a self-declared electronic Certificate of Origin on Trade Connect with a digital signature linked to the IEC, under the UK and EFTA agreements; under the New Zealand agreement only exporters recognised as Status Holders may declare origin themselves.
IEC, DSC, RCMC, Udyam	Importer-Exporter Code (DGFT); Digital Signature Certificate; Registration-cum-Membership Certificate with a Council; MSME registration.
TRQ	Tariff rate quota: a quantity that enters at the lower duty each year, beyond which the normal duty applies.
SPS, TBT	Sanitary and phytosanitary measures (food safety, plant and animal health) and technical barriers to trade (standards, labelling, testing, certification).
CBAM	The EU's carbon border adjustment mechanism, which from 2026 charges importers of iron, steel, aluminium, cement, fertiliser, hydrogen and electricity for embedded emissions; exporters must supply the emissions data.
REACH	The EU (and separately the UK) regulation on registration, evaluation and authorisation of chemicals; substances placed on the market above one tonne a year must be registered.
EPM, Niryat Protsahan, Niryat Disha, TRACE, LIFT, MAS, FLOW, INSIGHT	The Export Promotion Mission and its schemes (Part D1).
ICD, CFS	Inland container depot and container freight station: dry ports where containers are stuffed, examined and cleared before moving to the seaport.
DEH, DEAP, ODOP	Districts as Export Hubs; District Export Action Plan; One District One Product.
Build-down, build-up	The two ways of computing value content. Build-down: FOB (or ex-works) value minus the value of non-originating materials, divided by the FOB (or ex-works) value. Build-up: the value of originating materials plus direct processing cost, divided by the same value. The agreement sets a threshold for each.
Ex-works price, FOB value	Ex-works: the price at the factory gate. FOB: the price with the goods loaded on the ship or aircraft at the Indian port. The UK and EFTA rules allow either price, with thresholds that differ by five points between the two (Annex 1); the UAE, Australia, Oman and New Zealand rules use FOB.

Term	Meaning
Melt and pour	A rule for iron and steel: the metal must have been melted in a furnace and poured into its first solid shape in India or the partner. Steel made from imported slabs or billets does not meet it.
Status Holder	An exporter recognised by DGFT under the Foreign Trade Policy (One Star to Five Star Export House). Under the New Zealand agreement a Status Holder may sign its own origin declaration.
Importer’s knowledge	Under the UK agreement a UK importer may claim the preference on its own knowledge that the good originates, holding the documents the exporter supplies, without an origin declaration or certificate.
Tariff line, HS 2022	A line of the tariff identified by its HS code. The rules of origin of the recent agreements are written on the 2022 edition of the Harmonised System.
